Everyday performance

2011 QUARTERLY REPORT

Crombie REIT

Three Months Ended March 31, 2011

Quarterly Report to Unitholders

Crombie Real Estate Investment Trust ("Crombie") is an open-ended real estate investment trust established under, and governed by, the laws of the Province of Ontario. The trust invests in income-producing retail, office and mixed-use properties in Canada, with a future growth strategy focused primarily on the acquisition of retail properties. Crombie currently owns a portfolio of 131 commercial properties in eight provinces, comprising approximately 12.1 million square feet of rentable space.

Crombie will provide additional details concerning its first quarter results on a conference call held Thursday, May 5, 2011. Replay of the call is available on Crombie's website www.crombiereit.com for a period of approximately 90 days.

Forward-looking Statements

This quarterly report contains forward-looking statements that reflect the current expectations of management of Crombie about Crombie's future results, performance, achievements, prospects and opportunities. Wherever possible, words such as "may", "will", "estimate", "anticipate", "believe", "expect", "intend" and similar expressions have been used to identify these forward-looking statements. These statements reflect current beliefs and are based on information currently available to management of Crombie. Forward-looking statements necessarily involve known and unknown risks and uncertainties. A number of factors, including those discussed in the annual Management's Discussion and Analysis under "Risk Management" in the 2010 Annual Report, could cause actual results, performance, achievements, prospects or opportunities to differ materially from the results discussed or implied in the forward-looking statements. These factors should be considered carefully and a reader should not place undue reliance on the forward-looking statements. There can be no assurance that the expectations of management of Crombie will prove to be correct.

Readers are cautioned that such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from these statements. Crombie can give no assurance that actual results will be consistent with these forward-looking statements.

Letter to Unitholders

Crombie Real Estate Investment Trust ("Crombie") (TSX: CRR.UN) is pleased to report its results for the first quarter ended March 31, 2011. The financial results are prepared in accordance with International Financial Reporting Standards ("IFRS").

2011 Highlights

- Property revenue for the quarter ended March 31, 2011 of $56.3 million; an increase of $5.0 million, or 9.7% over the $51.3 million for the quarter ended March 31, 2010.
- Same-asset cash net operating income ("NOI") for the quarter ended March 31, 2011 of $30.3 million; an increase of $0.8 million or 2.9%, compared to $29.5 million for the quarter ended March 31, 2010.
- Property occupancy was 95.3% at March 31, 2011 compared with 95.8% at December 31, 2010, and 95.0% at March 31, 2010.
- Average net rent per square foot from leasing activity for the quarter increased to $16.69 compared to average expiring net rent per square foot of $14.15, an increase of 18.0%.
- Crombie completed leasing activity on 456,000 square feet of Gross Leaseable Area ("GLA") during the quarter ended March 31, 2011, which represents approximately 41.8% of its 2011 expiring leases.
- Funds from operations ("FFO") for the quarter ended March 31, 2011 was $0.26 per unit (payout ratio 86.9%) compared to $0.25 per unit (payout ratio 88.7%) for the same period in 2010.
- Adjusted funds from operations ("AFFO") for the quarter ended March 31, 2011 was $0.23 per unit (payout ratio 96.7%) compared to $0.22 per unit (payout ratio 103.7%) for the same period in 2010.

Other Performance Measures

Crombie's FFO and AFFO had the following results during the first quarter ended March 31st:

	Quarter ended March 31,		Variance	
(In millions of CAD dollars, except per unit amounts)	2011	2010	$	%
FFO	$16.983	$15.297	$1.686	11.0%
FFO Per Unit – basic	$0.26	$0.25	$0.01	4.0%
FFO Per Unit – diluted	$0.25	$0.24	$0.01	4.2%
FFO Payout ratio	86.9%	88.7%		1.8%
AFFO	$15.259	$13.087	$2.172	16.6%
AFFO Per Unit – basic	$0.23	$0.22	$0.01	4.5%
AFFO Per Unit – diluted	$0.22	$0.21	$0.01	4.8%
AFFO Payout ratio	96.7%	103.7%		7.0%

The increase in FFO for the quarter ended March 31, 2011 of $1.7 million was primarily due to: increased NOI attributable to the acquisition and redevelopment properties offset in part by higher finance costs – operations associated with the acquisition and redevelopment properties.

AFFO for the quarter ended March 31, 2011 of $15.3 million increased $2.2 million over the same period in 2010 due primarily to the increase in FFO.

Financial Overview

Same property NOI grew 1.4% over Q1 of 2010. Same-asset property revenue for the first quarter ended March 31, 2011 of $49.0 million was 2.5% higher than the same period in 2010, due to increased base rent and recoveries as a result of higher above average renewal rates and higher recoverable property expenses.

Same-asset property expenses of $19.1 million for the quarter ended March 31, 2011 were $0.8 million or 4.3% higher than the quarter ended March 31, 2010 due primarily to increased recoverable property taxes and snow clearing costs, offset in part by reduced non-recoverable costs.

Closing Remarks

We are encouraged by the improved year-over-year FFO and AFFO per unit results and the payout ratios achieved in the first quarter of 2011. The contribution from our acquisition and redevelopment programs continues to pay dividends. The strong 2.9% growth in same asset cash NOI continues to show the resiliency in Crombie's portfolio.

Although the required activity to transition to IFRS this quarter has been substantial, we are pleased to note that most operating metrics for Crombie have seen no material change.

On May 2, 2011 we completed the acquisition of a 73,807 square foot retail property in Red Deer, Alberta from a third party. The acquisition price was $21.9 million, which represents a capitalization rate of 7.26%. The property, built in 2008 and 2009 is 100% leased to primarily national retailers with a weighted average remaining lease term of 14.7 years. Crombie assumed a mortgage of $11.7 million upon closing with the balance of the purchase price being initially satisfied through our revolving credit facility.

We have also signed purchase and sale agreements on two properties through our relationship with Empire Company Limited totalling 137,644 square feet of gross leaseable area and we expect these transactions to close during the second quarter. The purchase price is expected to be $27.5 million, which represents a weighted average capitalization rate of 7.33%. The properties are located in Dartmouth, Nova Scotia and Orangeville, Ontario and are 100% leased. The property in Nova Scotia is a Sobeys anchored retail plaza and the Ontario property is a freestanding Sobeys store. The purchase price will be initially satisfied through a combination of mortgage debt and our revolving credit facility.

While we are pleased to announce these new acquisitions, we will continue to seek out further accretive acquisitions through both our relationship with Empire Company Limited and Sobeys Inc. and third parties.

Donald E. Clow, FCA

Management's Discussion and Analysis

(In thousands of CAD dollars, except per unit amounts)

The following is Management's Discussion and Analysis ("MD&A") of the consolidated financial condition and results of operations of Crombie Real Estate Investment Trust ("Crombie") for the quarter ended March 31, 2011, with a comparison to the financial condition and results of operations for the comparable period in 2010.

This MD&A should be read in conjunction with Crombie's interim consolidated financial statements and accompanying notes for the period ended March 31, 2011 prepared in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting. This MD&A should also be read in conjunction with Crombie's audited consolidated financial statements and accompanying notes for the year ended December 31, 2010, which were prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP"), and the related MD&A. Information about Crombie can be found on SEDAR at www.sedar.com.

FORWARD-LOOKING INFORMATION

This MD&A contains forward-looking statements that reflect the current expectations of management of Crombie about Crombie's future results, performance, achievements, prospects and opportunities. Wherever possible, words such as "may", "will", "estimate", "anticipate", "believe", "expect", "intend" and similar expressions have been used to identify these forward-looking statements. These statements reflect current beliefs and are based on information currently available to management of Crombie. Forward-looking statements necessarily involve known and unknown risks and uncertainties. A number of factors, including those discussed under "Risk Management" could cause actual results, performance, achievements, prospects or opportunities to differ materially from the results discussed or implied in the forward-looking statements. These factors should be considered carefully and a reader should not place undue reliance on the forward-looking statements. There can be no assurance that the expectations of management of Crombie will prove to be correct.

In particular, certain statements in this document discuss Crombie's anticipated outlook of future events. These statements include, but are not limited to:

(i) the development of new properties under development agreements, which development activities are undertaken by related parties and thus are not under the direct control of Crombie and whose activities could be impacted by real estate market cycles, the availability of labour and general economic conditions;

(ii) the acquisition of accretive properties and the anticipated extent of the accretion of any acquisitions, which could be impacted by demand for properties and the effect that demand has on acquisition capitalization rates and changes in interest rates;

(iii) reinvesting to make improvements to existing properties, which could be impacted by the availability of labour, capital resource allocation decisions and actual redevelopment costs;

(iv) generating improved rental income and occupancy levels, which could be impacted by changes in demand for Crombie's properties, tenant bankruptcies, the effects of general economic conditions and supply of competitive locations in proximity to Crombie locations;

(v) the anticipated rate of general and administrative expenses as a percentage of property revenue, which could be impacted by changes in property revenue and/or changes in general and administrative expenses;

(vi) overall indebtedness levels and terms, which could be impacted by the level of acquisition activity Crombie is able to achieve and future financing opportunities;

(vii) the estimated payments on derivative and non-derivative financial liabilities, which could be impacted by interest rate subsidy payments, conversions of convertible debentures, interest rates on floating rate debt and fluctuations in the settlement value and settlement timing of derivative financial liabilities;

(viii) tax exempt status, which can be impacted by regulatory changes enacted by governmental authorities;

(ix) anticipated subsidy payments from ECL Developments Limited ("ECLD"), which are dependent on tenant leasing and construction activity;

(x) anticipated distributions and payout ratios, which could be impacted by results of operations and capital resource allocation decisions;

(xi) the effect that any contingencies would have on Crombie's financial statements which could be impacted by their eventual outcome;

(xii) the assumed estimated impact per unit upon future settlement of interest rate swap agreements which may be impacted by changes in Canadian bond yields and swap spreads, as well as the timing and type of financing available and the related amortization period thereon;

(xiii) anticipated replacement of expiring tenancies, which could be impacted by the effects of general economic conditions and the supply of competitive locations; and

(xiv) the expected completion and method of financing for agreed additional acquisitions from Empire, which may be impacted by due diligence matters and debt market conditions.

Readers are cautioned that such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from these statements. Crombie can give no assurance that actual results will be consistent with these forward-looking statements.

NON-IFRS FINANCIAL MEASURES

There are financial measures included in this MD&A that do not have a standardized meaning under International Financial Reporting Standards ("IFRS") as prescribed by the International Accounting Standards Board ("IASB"). These measures are property net operating income ("NOI"), same property NOI and same property cash NOI, operating income attributable to Unitholders, adjusted funds from operations ("AFFO"), debt to gross book value, funds from operations ("FFO"), and earnings before interest, taxes, depreciation and amortization ("EBITDA"). Management includes these measures because it believes certain investors use these measures as a means of assessing relative financial performance.

INTRODUCTION

Date of MD&A

The information contained in the MD&A, including forward-looking statements, is based on information available to management as of May 4, 2011, except as otherwise noted.

Financial and Operational Summary

(in thousands of CAD dollars, except per unit amounts and as otherwise noted)	Quarter Ended March 31, 2011	Quarter Ended March 31, 2010
Property revenue	$56,318	$51,358
Operating income attributable to Unitholders	$9,326	$7,175
Basic and diluted operating income attributable to Unitholders per unit	$0.14	$0.12
FFO	$16,983	$15,297
FFO per unit – basic	$0.26	$0.25
FFO per unit – diluted[1]	$0.25	$0.24
FFO payout ratio (%)	86.9%	88.7%
AFFO	$15,259	$13,087
AFFO per unit- basic	$0.23	$0.22
AFFO per unit-diluted[1]	$0.22	$0.21
AFFO payout ratio (%)[2]	96.7%	103.7%

(1) The diluted weighted average number of total Units and Class B LP Units with attached Special Voting Units includes the conversion of all series of convertible debentures outstanding during the period, excluding any series that is anti-dilutive. For March 31, 2011, Series A Debentures are anti-dilutive for AFFO per unit calculations. For March 31, 2010, the Series A Debentures and Series C Debentures are anti-dilutive for AFFO per unit calculations. For both March 31, 2011 and March 31, 2010, all series of convertible debentures are anti-dilutive for operating income attributable to Unitholders per unit calculation.

(2) AFFO payout ratio is calculated using a per square foot charge of $1.10 for maintenance expenditures (se "AFFO" section).

Adoption of IFRS

This MD&A reflects the adoption of IFRS effective from January 1, 2010, with information for 2010 being restated from that which was previously issued under Canadian GAAP. Periods prior to January 1, 2010 have not been restated.

Note 26 of Crombie's consolidated financial statements for the three months ended March 31, 2011 provides a description of Crombie's transition to IFRS and the detailed impact on the previously reported Canadian GAAP financial information for 2010.

Classification of Crombie REIT Units and Class B LP Units with attached Special Voting Units (collectively the "Units")

On transition to IFRS, Crombie determined that in accordance with IAS 32 Financial Instruments: Presentation, Crombie's Units are to be classified as financial liabilities on the Balance Sheet. Each of the REIT Units and Class B LP Units are puttable by the respective holder and meet the definition of financial liabilities under IFRS. IAS 32 provides an exception test which, if met, would result in either, or both, of the Units being classified as equity instruments. Crombie has determined that the exception test has not been met for either the REIT Units or Class B LP Units and as such, Crombie has no instrument meeting the definition of equity instruments within the IFRS standard. In addition, whereas the Units are classified as financial liabilities on the Balance Sheet, distributions on the Units are recognized as a finance charge on the Statement of Comprehensive Income (Loss). Prior to the transition to IFRS, distributions to holders of equity instruments were recognized as a reduction of Unitholders Equity and Non-controlling Interest, respectively.

Overview of the Business and Recent Developments

Crombie is an unincorporated, open-ended real estate investment trust established pursuant to a Declaration of Trust dated January 1, 2006, as amended and restated (the "Declaration of Trust") under, and governed by, the laws of the Province of Ontario. The REIT units of Crombie trade on the Toronto Stock Exchange ("TSX") under the symbol CRR.UN.

Crombie invests in income-producing retail, office and mixed-use properties in Canada, with a future growth strategy focused primarily on the acquisition of grocery-anchored retail properties. At March 31, 2011, Crombie owned a portfolio of 130 investment properties in eight provinces, comprising approximately 12.0 million square feet of gross leaseable area ("GLA"). Empire Company Limited ("Empire" or "ECL"), through its subsidiary ECLD, holds a 46.4% economic and voting interest in Crombie at March 31, 2011.

Significant developments during 2011 include:

- On January 1, 2011, Crombie transitioned to IFRS from Canadian GAAP. There were no other significant developments during the first quarter.

Significant developments during 2010 included:

- On February 1, 2010, Crombie completed the refinancing for the office and retail portfolio known as Halifax Developments. The principal amount of the maturing Halifax Developments mortgages was approximately $106,079 with a weighted average fixed interest rate of 5.43%. The new Halifax Developments mortgages are for a total of $141,000, with a ten year term, 25 year amortization and a weighted average fixed interest rate of 6.48%.
- On February 8, 2010, Crombie issued $45,000 of convertible unsecured subordinated debentures (the "Series C Debentures"). The Series C Debentures have an interest rate of 5.75%, a conversion price of $15.30 per unit and a maturity date of June 30, 2017.
- On February 22, 2010, Crombie completed the acquisition of five of the eight retail properties previously announced on November 5, 2009, from subsidiaries of Empire. The cost of the five properties was $31,530, excluding closing and transaction costs, and was partially financed by the assumption of $8,358 of mortgages with a weighted average term of 8.6 years, 25 year amortization and a weighted average interest rate of 6.26%. The balance was financed with Crombie's existing credit facility.
- On February 26, 2010, Crombie completed $33,850 of mortgage financing on five properties. The mortgages have an eight year term, a fixed interest rate of 5.70% and a weighted average amortization period of 21.6 years.
- On March 24, 2010, Crombie completed the acquisition of the remaining three properties of the eight retail properties previously announced on November 5, 2009 from subsidiaries of Empire. The purchase price of the three properties was $27,746 and was financed with Crombie's existing credit facility.
- On April 22, 2010, and May 20, 2010, Crombie completed three mortgage financings totalling $19,000 in principal; all with ten year terms; interest rates ranging from 5.75% to 6.80%; and amortization periods from 15 to 25 years.
- On August 4, 2010, Crombie completed a public offering of 2,670,000 REIT Units, at a price of $11.05 per REIT Unit for gross proceeds of $29,504. Concurrent with the public offering, in satisfaction of its pre-emptive right, ECLD subscribed for 1,855,000 Class B LP Units and the attached Special Voting Units, on a private placement basis, at the same issue price of $11.05 per Class B LP Unit for gross proceeds of $20,498.
- On September 28, 2010, Crombie completed the acquisition of nine of the properties previously announced on July 14, 2010, from a subsidiary of Empire. The cost of the nine properties was $84,297, excluding closing and transaction costs, and was partially financed with mortgage financing on seven of the nine properties. The mortgages total $51,570 at the time of acquisition and an additional $8,200 subsequently with terms ranging from nine to 15 years, amortization periods between

15 and 25 years, and interest rates between 4.53% and 5.19%. The properties acquired total approximately 400,000 square feet of GLA and include six properties in Alberta, one in Saskatchewan, one in Ontario and one in Nova Scotia.

- On October 28, 2010, Crombie completed the acquisition of one retail property, and on November 22, 2010 the acquisition of two retail properties, all located in Quebec. The cost of the three properties was $28,250, excluding closing and transaction costs, and was partially financed with $19,600 of mortgage financings with the balance funded with proceeds from the August 2010 equity offering. The mortgages have terms from nine to 15 years, fixed interest rates of 4.71% and 4.76% and amortization periods of 25 years.

Business Strategy and Outlook

The objectives of Crombie are threefold:

1. Generate reliable and growing cash distributions;
2. Enhance the value of Crombie's assets and maximize long-term unit value through active asset management; and
3. Expand the asset base of Crombie and increase its cash available for distribution through accretive acquisitions.

Generate reliable and growing cash distributions: Management focuses both on improving the same-asset results while expanding the asset base with accretive acquisitions to grow the cash distributions to unitholders. Crombie's focus on grocery-anchored retail properties, a stable and defensive-oriented asset class, assists in enhancing the reliability of cash distributions.

Enhance value of Crombie's assets: Crombie anticipates reinvesting approximately 3% to 5% of its property revenue each year into its properties to maintain their productive capacity and thus overall value.

Crombie's internal growth strategy focuses on generating greater rental income from its existing properties. Crombie plans to achieve this by strengthening its asset base through judicious expansion and improvement of existing properties, leasing vacant space at competitive market rates with the lowest possible transaction costs, and maintaining good relations with tenants. Management will continue to conduct regular reviews of properties and, based on its experience and market knowledge, assess ongoing opportunities within the portfolio.

Expand asset base with accretive acquisitions: Crombie's external growth strategy focuses primarily on acquisitions of income-producing, grocery-anchored retail properties. Crombie pursues two primary sources of acquisitions which are third party acquisitions and the relationship with ECLD and Sobeys Developments Limited Partnership ("SDLP"). The relationship with ECLD and SDLP includes currently owned and future development properties, as well as opportunities through the rights of first refusal ("ROFR") that one of Empire's subsidiaries has negotiated in certain of their third party leases. Crombie will seek to identify future property acquisitions using investment criteria that focuses on the strength of anchor tenancies, market demographics, age of properties, terms of tenancies, proportion of revenue from national tenants, opportunities for expansion, security of cash flow, potential for capital appreciation and potential for increasing value through more efficient management of the assets being acquired, including expansion and repositioning.

Crombie continues to work closely with ECLD and SDLP to identify development opportunities that further Crombie's external growth strategy. The relationship with ECLD is governed by a development agreement described in the Material Contracts section of Crombie's Annual Information Form, while the relationship with SDLP in respect of certain properties is governed by a similar development agreement. Through these relationships, Crombie expects to have many of the benefits associated with development while limiting its exposure to the inherent risks of development, such as real estate market cycles, cost overruns, labour disputes, construction delays and unpredictable general economic conditions. The development agreements also enable Crombie to avoid the uncertainties associated with property development, such as paying the carrying costs of land, securing construction financing, obtaining development approvals, managing construction projects, marketing in advance of and during construction and earning no return during the construction period.

The development agreements provide Crombie with a preferential right to acquire retail properties developed by ECLD and/or SDLP, subject to approval by Crombie's independent and non-Empire appointed trustees. These relationships between Crombie and ECLD and SDLP continue to provide promising opportunities for growth in Crombie's portfolio through future developments on both new and existing sites.

The following table outlines the acquisitions completed since the initial public offering ("IPO") which highlight the growth opportunities provided through the Empire /Sobeys/ ECLD relationship.

Property	Date Acquired	Property Type	GLA (sq. ft.)	Acquisition Cost[1]	Vendor
Brampton Plaza, Brampton, Ontario	Oct. 2, 2006	Retail - Plaza	66,000	$13,160	Empire Subsidiaries
Taunton & Wilson Plaza, Oshawa, Ontario	Oct. 2, 2006	Retail - Plaza	83,000	$18,725	Empire Subsidiaries
Burlington Plaza, Burlington, Ontario	Dec. 20, 2006	Retail - Plaza	56,000	$14,200	3rd party
The Mews of Carleton Place, Carleton Place, Ontario	Jan. 17, 2007	Retail - Plaza	80,000	$11,800	3rd party
Perth Mews Shopping Mall, Perth, Ontario	Mar. 7, 2007	Retail - Plaza	103,000	$17,900	3rd party
International Gateway Centre, Fort Erie, Ontario	Jul. 26, 2007	Retail - Plaza	93,000	$19,200	3rd party ROFR
Brossard-Longueuil, Brossard, Quebec	Aug. 24, 2007	Retail - Freestanding	39,000	$7,300	3rd party ROFR
Town Centre, LaSalle, Ontario	Oct. 15, 2007	Retail - Plaza	88,000	$12,700	3rd party
61 property portfolio (the "Portfolio Acquisition")	Apr. 22, 2008	Retail – Freestanding Retail – Plaza Retail – Enclosed	1,589,000 1,571,000 128,000	$428,500	Empire Subsidiaries
River City Centre, Saskatoon, Saskatchewan	Jun. 12, 2008	Retail – Plaza	160,000	$27,200	3rd party
5 property portfolio	Feb. 22, 2010	Retail - Plaza	186,000	$31,530	Empire Subsidiaries
3 property portfolio	Mar. 24, 2010	Retail - Plaza Retail - Freestanding	101,000 46,000	$27,746	Empire Subsidiaries
9 property portfolio	Sep. 28, 2010	Retail – Freestanding Retail - Plaza	359,000 41,000	$84,297	Empire Subsidiaries
McMasterville, Quebec	Oct. 28, 2010	Retail - Plaza	47,000	$11,250	Empire Subsidiaries
St Augustin, Quebec	Nov. 22, 2010	Retail – Plaza	38,000	$7,368	Joint venture, in which ECLD was a partner
St Charles de Drummond, Quebec	Nov. 22, 2010	Retail - Plaza	48,000	$9,632	Joint venture, in which ECLD was a partner
Total			4,922,000	$742,508	

(1) Excluding closing and transaction costs.

There is approximately 1.9 million square feet in 22 development properties that can be offered to Crombie on a preferential right through the Empire/ECLD/SDLP relationships when the properties are sufficiently developed to meet Crombie's acquisition criteria. The properties are primarily retail plazas and approximately 72% of the GLA of the 22 properties is located outside of Atlantic Canada. These properties are anticipated to be made available to Crombie over the next four years.

Business Environment

During the latter half of 2009 and throughout 2010, the Canadian economy continued to display strengthening results in a number of key economic areas, which indicate that a modest economic recovery has taken place. However, concerns still exist as to the sustainability of the recovery as debt levels of both governments and consumers continue to rise and unemployment levels remain high. Also, during this 2009 - 2010 period, the credit and equity markets experienced a dramatic improvement in their liquidity which occurred almost as quickly as the contraction did in late 2008. This liquidity expansion has helped reduce credit spreads to more historically normal levels and resulted in attractive overall financing costs which many Canadian real estate investment trusts ("REITs") and real estate companies, including Crombie, have taken advantage of to strengthen their financial position, improve liquidity and lower their weighted average cost of capital. In the second half of 2010, Crombie sourced nine and 15 year mortgage debt at rates between 4.53% and 5.19%. Further, Crombie's $150 million revolving credit facility expires on June 30, 2011 and is currently in the process of being renewed.

In light of the improving economic conditions and improved access to capital, capitalization rates began to contract after their expansion during the recession. This capitalization rate contraction has resulted in a positive impact to the unit prices of many REITs and

the recent improvement in both the credit and equity markets have improved Crombie's cost of capital to the level where accretive acquisitions could be considered. As a result, Crombie was able to complete acquisitions of eight retail properties from subsidiaries of Empire during the first quarter of 2010, an additional nine properties in the third quarter of 2010 and three properties in the fourth quarter of 2010. Crombie will only pursue acquisitions that are accretive and provide an acceptable return, including acquisitions that result from the relationship between Crombie and ECLD and Crombie and SDLP.

In terms of occupancy rates, both the retail and office markets in Atlantic Canada where Crombie has a prominent presence remain relatively stable. Historically, Atlantic Canada has been a "no boom, no bust" economy, resulting in stable operating performance over time. The overall business environment outlook is cautiously optimistic, influenced by the early recovery noted in the Canadian economy. However, there remains a lack of clarity as to the sustainability of the recovery. One offsetting factor is that many of Crombie's retail locations are anchored by food stores, which typically are less affected by swings in consumer spending.

2011 HIGHLIGHTS

- Crombie completed leasing activity on 456,000 square feet of GLA during the first quarter of 2011, which represents approximately 41.8% of its 2011 expiring leases.
- Average net rent per square foot from the leasing activity increased to $16.69 from the expiring rent per square foot of $14.15, an increase of 18.0%.
- Property occupancy was 95.3% at March 31, 2011 compared with 95.0% at March 31, 2010, and 95.8% at December 31, 2010.
- Property revenue for the quarter ended March 31, 2011 was $56,318, an increase of $4,960, or 9.7% over the $51,358 for the quarter ended March 31, 2010.
- Same-asset cash NOI for the quarter ended March 31, 2011 of $30,326, an increase of $862, or 2.9%, compared to $29,464 for the quarter ended March 31, 2010.
- The FFO payout ratio for the quarter ended March 31, 2011 was 86.9% compared to the payout ratio of 88.7% for the same period in 2010.
- The AFFO payout ratio for the quarter ended March 31, 2011 was 96.7% compared to 103.7% for the same period in 2010.
- Debt to gross book value was 56.0% at March 31, 2011 compared to 56.5% at December 31, 2010 and 56.8% at March 31, 2010.
- Crombie's interest service coverage for the quarter ended March 31, 2011 was 2.47 times EBITDA and debt service coverage was 1.75 times EBITDA, compared to 2.46 times EBITDA and 1.74 times EBITDA, respectively, for the same period in 2010.

OVERVIEW OF THE PROPERTY PORTFOLIO

Property Profile

At March 31, 2011 the property portfolio consisted of 130 investment properties that contain approximately 12.0 million square feet of GLA. The properties are located in eight provinces: (Nova Scotia, New Brunswick, Ontario, Newfoundland and Labrador, Quebec, Prince Edward Island, Alberta and Saskatchewan).

As at March 31, 2011, the portfolio distribution of the GLA by province was as follows:

Province	Number of Properties	GLA (sq. ft.)	% of GLA	% of Annual Minimum Rent	Occupancy[1]
Nova Scotia	42	5,069,000	42.3%	37.3%	94.8%
New Brunswick	23	1,784,000	14.9%	12.6%	91.4%
Ontario	24	1,775,000	14.8%	16.7%	94.9%
Newfoundland and Labrador	13	1,480,000	12.3%	16.2%	98.1%
Quebec	17	1,042,000	8.7%	9.3%	98.2%
Prince Edward Island	3	369,000	3.1%	2.8%	97.9%
Alberta	6	274,000	2.3%	3.3%	100.0%
Saskatchewan	2	198,000	1.6%	1.8%	100.0%
Total	130	11,991,000	100.0%	100.0%	95.3%

(1) For purposes of calculating occupancy percentage, Crombie considers GLA covered by the head lease agreements in favour of ECLD as occupied as there is head lease revenue being earned on the GLA.

During the first quarter of 2011, there was an increase in GLA of 8,000 square feet due to the addition of approximately 4,000 square feet as part of the ongoing redevelopment at Sydney Shopping Centre in Sydney, Nova Scotia and the addition of two tenant spaces of approximately 4,000 square feet at Taunton and Wilson in Oshawa, Ontario.

The decrease in overall occupancy to 95.3% at March 31, 2011 compared with 95.8% at December 31, 2010 was due mainly to a number of tenant lease expirations or terminations totalling approximately 111,000 square feet of GLA. The decrease was partially offset by new tenancies occupying approximately 61,000 square feet of GLA during the first quarter of 2011. Crombie had 139,000 square feet of GLA in new leasing activity during the quarter ended March 31, 2011, however not all tenant leases commenced by March 31, 2011, therefore they are excluded from the period end occupancy rate.

Crombie looks to diversify its geographic composition through growth opportunities, as evidenced by six property acquisitions in Alberta, nine in Ontario, five in Quebec, two in Saskatchewan, three in New Brunswick, one in Nova Scotia and the Portfolio Acquisition since Crombie's 2006 IPO. As well, the properties are located in urban and rural locations, which Crombie believes adds stability to the portfolio while reducing vulnerability to economic fluctuations that may affect any particular region.

On a regular basis, Crombie will commence redevelopment work on a property to enhance the economic viability of a location when the environment in which it operates warrants. Crombie currently has one property under redevelopment: Sydney Shopping Centre in Sydney, Nova Scotia is being converted from a retail - enclosed property to a retail - plaza.

The following table outlines properties under redevelopment:

Province	Property	Current GLA	Redevelopment	Estimated Cost	Incurred To Date	Estimated Completion
Nova Scotia	Sydney Shopping Centre	176,000	Convert from retail - enclosed to retail - plaza	$12,400	$5,827	January 2012

During the second quarter of 2010, Crombie commenced redevelopment work on Sydney Shopping Centre. A portion of the GLA was vacated for the initial phases of the redevelopment, scheduled for completion in January 2012.

Properties under development are excluded from same asset results until the redevelopment is complete and the operating results from the redevelopment property are available for the current and comparative reporting periods.

Largest Tenants

The following table illustrates the ten largest tenants in Crombie's portfolio of income-producing properties as measured by their percentage contribution to total annual minimum base rent as at March 31, 2011.

Tenant	% of Annual Minimum Rent	Average Remaining Lease Term
Sobeys [(1)]	36.3%	15.4 years
Shoppers Drug Mart	2.0%	6.8 years
Empire Theatres Limited	1.9%	7.7 years
Zellers	1.9%	6.7 years
Nova Scotia Power Inc.	1.7%	0.6 years
CIBC	1.6%	19.1 years
Lawtons/Sobeys Pharmacy	1.3%	12.8 years
Bell (Aliant)	1.3%	7.7 years
Bank of Nova Scotia	1.2%	2.8 years
Province of Nova Scotia	1.2%	5.0 years
Total	50.4%	

(1) Excludes Lawtons and Fast Fuel locations.

Crombie's portfolio is leased to a wide variety of tenants. Other than Sobeys, which accounts for 36.3% of the annual minimum rent, no other tenant accounts for more than 2.0% of Crombie's minimum rent. Nova Scotia Power Inc. ("NSPI") leased approximately 185,000 square feet in Barrington Tower, Halifax, Nova Scotia, under a long-term lease that expired March 31, 2011. NSPI will not be renewing their long-term lease; however they continued occupying approximately 115,000 square feet of that space under a short-term lease. Of the approximately 185,000 square feet, 47,000 square feet has been leased as of April 1, 2011 with an additional 93,000 square feet under a committed contract to commence mid 2012. Crombie continues to work on leasing the remainder of the space and is confident of replacing NSPI with new tenancies.

Lease Maturities

The following table sets out as of March 31, 2011 the number of leases maturing during the periods indicated (assuming tenants do not holdover on a month-to-month basis or exercise renewal options or termination rights), the renewal area, the percentage of the total GLA of the properties represented by such maturities and the estimated average net rent per square foot at the time of expiry. The

weighted average remaining term of all leases is approximately 10.1 years. This extended remaining lease term is reflective of the average Sobeys remaining lease term of 15.4 years.

Year	Number of Leases	Renewal Area (sq. ft.)	% of Total GLA	Average Net Rent per Sq. Ft. at Expiry ($)
Remainder of 2011	211	737,000	6.1%	$13.60
2012	190	1,170,000	9.8%	$12.69
2013	183	918,000	7.7%	$12.14
2014	167	517,000	4.3%	$18.27
2015	139	648,000	5.4%	$14.83
Thereafter	432	7,438,000	62.0%	$13.37
Total	1,322	11,428,000	95.3%	$13.52

2011 Portfolio Lease Expiries and Leasing Activity

As at March 31, 2011, the portfolio lease expiries and leasing activity for the year ending December 31, 2011 were as follows:

	Retail - Freestanding	Retail - Plazas	Retail - Enclosed	Office	Mixed-use	Total
Expiries (sq. ft.)	4,000	328,000	174,000	334,000	252,000	1,092,000
Average net rent per sq. ft.	$28.00	$14.60	$15.77	$14.31	$12.09	$14.15
Committed renewals (sq. ft.)	4,000	101,000	33,000	176,000	3,000	317,000
Average net rent per sq. ft.	$35.00	$14.71	$22.30	$19.50	$22.05	$18.04
New leasing (sq. ft.)	--	19,000	5,000	98,000	17,000	139,000
Average net rent per sq. ft.	$--	$18.68	$38.62	$11.22	$14.67	$13.59
Total renewals/new leasing (sq. ft.)	4,000	120,000	38,000	274,000	20,000	456,000
Total average net rent per sq. ft.	$35.00	$15.35	$24.29	$16.54	$15.89	$16.69

Leasing activity during the quarter ended March 31, 2011 had tenant renewals or new lease tenants of approximately 456,000 square feet at an average net rent of $16.69 per square foot, compared with expiries for 2011 of 1,092,000 square feet at an average net rent of $14.15 per square foot. Of the 1,092,000 square feet of expiries, approximately 219,000 square feet involve tenants that are still paying property revenues on a holdover basis.

Total committed renewals were completed at an average rate of $18.04 per square foot, an increase of 27.5% compared to the average expiry rate of $14.15. The total committed renewal rate during the quarter is impacted by the renewal of kiosk space and other tenants at Avalon Mall in St. John's, Newfoundland and Labrador which were completed at rates exceeding the overall portfolio average. New leasing was completed at an average rate of $13.59 per square foot, a decrease of 0.4% compared to the average expiry rate mainly due to the lease up of office space at Barrington Tower in Halifax, Nova Scotia.

The committed renewal rate and new leasing rate within specific sectors of the portfolio is impacted by the timing of leasing activity of specific space within a reporting period such as kiosks and food court space.

Sector Information

While Crombie does not distinguish or group its operations on a geographical or other basis, Crombie provides the following sector information as supplemental disclosure.

In the second quarter of 2010, Crombie reclassified Fairvale Plaza in New Brunswick from retail - plaza to retail - freestanding due to redevelopment. The March 31, 2010 numbers have been restated to reflect this reclassification.

As at March 31, 2011, the portfolio distribution of the GLA by asset type was as follows:

Asset Type	Number of Properties	GLA (sq. ft.)	% of GLA	% of Annual Minimum Rent	Occupancy[1]
Retail – Freestanding	51	2,095,000	17.5%	18.4%	100.0%
Retail – Plazas	54	4,687,000	39.0%	39.8%	96.4%
Retail – Enclosed	12	2,441,000	20.4%	21.7%	94.5%
Portfolio sub-totals for retail	117	9,223,000	76.9%	79.9%	96.7%
Office	5	1,049,000	8.8%	7.7%	84.3%
Mixed-Use	8	1,719,000	14.3%	12.4%	94.8%
Total	130	11,991,000	100.0%	100.0%	95.3%

(1) For purposes of calculating occupancy percentage, Crombie considers GLA covered by the head lease agreements in favour of ECLD as occupied.

As at March 31, 2010, the portfolio distribution of the GLA by asset type was as follows:

Asset Type	Number of Properties	GLA (sq. ft.)	% of GLA	% of Annual Minimum Rent	Occupancy[1]
Retail – Freestanding	43	1,737,000	15.0%	14.9%	100.0%
Retail – Plazas	50	4,506,000	39.1%	40.1%	96.2%
Retail – Enclosed	12	2,555,000	22.2%	23.5%	92.8%
Portfolio sub-totals for retail	105	8,798,000	76.3%	78.5%	94.9%
Office	5	1,049,000	9.1%	8.7%	87.4%
Mixed-Use	8	1,686,000	14.6%	12.8%	94.7%
Total	118	11,533,000	100.0%	100.0%	95.0%

(1) For purposes of calculating occupancy percentage, Crombie considers GLA covered by the head lease agreements in favour of ECLD as occupied.

Retail properties represent 76.9% of Crombie's GLA and 79.9% of annual minimum rent at March 31, 2011 versus 76.3% and 78.5% respectively at March 31, 2010. This year-over-year increase is reflective of Crombie's growth strategy to focus primarily on retail properties.

Occupancy in retail properties increased to 96.7% at March 31, 2011, from 94.9% at March 31, 2010; while occupancy in non-retail properties decreased to 90.8% from 91.9%.

The following table sets out as of March 31, 2011, the square feet under lease subject to lease maturities during the periods indicated.

Year	Retail – Freestanding		Retail – Plazas		Retail – Enclosed	
	(sq. ft.)	(%)	(sq. ft.)	(%)	(sq. ft.)	(%)
2011	--	--%	283,000	6.1%	126,000	5.2%
2012	5,000	0.2%	309,000	6.6%	152,000	6.2%
2013	--	--%	408,000	8.5%	207,000	8.5%
2014	--	--%	232,000	5.0%	164,000	6.7%
2015	9,000	0.4%	311,000	6.7%	80,000	3.3%
Thereafter	2,081,000	99.4%	2,968,000	63.4%	1,579,000	64.6%
Total	2,095,000	100.0%	4,511,000	96.3%	2,308,000	94.5%

Year	Office		Mixed – Use		Total	
	(sq. ft.)	(%)	(sq. ft.)	(%)	(sq. ft.)	(%)
2011	86,000	8.2%	242,000	14.1%	737,000	6.1%
2012	369,000	35.2%	335,000	19.5%	1,170,000	9.8%
2013	104,000	9.9%	199,000	11.6%	918,000	7.7%
2014	88,000	8.4%	33,000	1.9%	517,000	4.3%
2015	31,000	2.9%	217,000	12.6%	648,000	5.4%
Thereafter	207,000	19.7%	603,000	35.1%	7,438,000	62.0%
Total	885,000	84.3%	1,629,000	94.8%	11,428,000	95.3%

Of the 8,914,000 square feet of retail properties under lease, 6,628,000 square feet, or 74.4% is scheduled for maturity after 2015. This long-term stability in lease maturities is primarily driven by the extended term nature of the Sobeys leases.

In the office and mixed-use properties, lease maturities after 2015 represents 32.2% of the leased square footage.

The following table sets out the average net rent per square foot expiring during the periods indicated.

Year	Retail - Freestanding	Retail – Plazas	Retail - Enclosed	Office	Mixed – Use	Total
2011	$--	$14.42	$15.31	$13.46	$11.81	$13.60
2012	$25.00	$13.40	$17.85	$13.80	$8.30	$12.69
2013	$--	$9.47	$15.78	$13.82	$12.94	$12.14
2014	$--	$15.15	$25.65	$12.62	$18.74	$18.27
2015	$25.32	$15.25	$22.40	$11.93	$11.45	$14.83
Thereafter	$13.92	$13.92	$12.06	$11.94	$12.70	$13.37
March 2011 Total	$13.99	$13.67	$14.28	$13.15	$11.65	$13.52
March 2010 Total	$13.25	$13.36	$13.92	$12.83	$11.24	$13.16

FINANCIAL RESULTS

COMPARISON TO PREVIOUS YEARS

(In thousands of CAD dollars, except per unit amounts and as otherwise noted)	As At		
	March 31, 2011	December 31, 2010	March 31, 2010
Total assets	$1,581,910	$1,589,236	$1,480,771
Total investment property debt and convertible debentures	$939,621	$947,560	$875,856
Debt to gross book value[(1)]	56.0%	56.5%	56.8%

(1) See "Debt to Gross Book Value" for detailed calculation.

(In thousands of CAD dollars, except per unit amounts and as otherwise noted)	Quarter Ended March 31,		
	2011	2010	Variance
Property revenue	$56,318	$51,358	$4,960
Property operating expenses	21,424	20,008	(1,416)
Property NOI	34,894	31,350	3,544
NOI margin percentage	62.0%	61.0%	1.0%
Expenses:			
Depreciation and amortization	(7,757)	(8,122)	365
General and administrative costs	(2,500)	(2,523)	23
Operating income before financing costs and income tax	24,637	20,705	3,932
Finance costs - operations	(15,411)	(13,530)	(1,881)
Operating income before income taxes	9,226	7,175	2,051
Income taxes - Deferred	100	--	100
Operating income attributable to Unitholders	9,326	7,175	2,151
Finance costs – distributions to Unitholders	(14,751)	(13,568)	(1,183)
Decrease in net assets attributable to Unitholders	$(5,425)	$(6,393)	$968
Operating income attributable to Unitholders per Unit, Basic and Diluted	$0.14	$0.12	$0.02
Basic weighted average Units outstanding (in 000's)	66,048	60,807	
Diluted weighted average Units outstanding (in 000's)	66,226	60,974	
Distributions per Unit to unitholders	$0.22	$0.22	

Operating income attributable to Unitholders for the quarter ended March 31, 2011 of $9,326 increased by $2,151 from $7,175 for the quarter ended March 31, 2010. The increase was primarily due to:

- higher property NOI on increased average rental rates and the impact of property acquisitions during 2010 and
- lower amortization of intangible assets associated with fully amortized intangibles offset in part by;
- higher property operating expenses mainly due to increased snow removal and property taxes.

Property Revenue and Property Operating Expense

Same-asset properties are properties owned and operated by Crombie throughout the current and comparative reporting periods, excluding any property that was being redeveloped during either the current or comparative period.

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Same-asset property revenue	$48,974	$47,764	$1,210
Acquisition and redevelopment property revenue	7,344	3,594	3,750
Property revenue	$56,318	$51,358	$4,960

Same-asset property revenue of $48,974 for the quarter ended March 31, 2011 was 2.5% higher than the quarter ended March 31, 2010 due to increased base rent and recoveries as a result of above average renewal rates and higher recoverable property expenses. Acquisition and redevelopment property revenue growth of $3,750 or 104.0% is due to more robust acquisition activity in 2010.

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Same-asset property operating expenses	$19,119	$18,334	$(785)
Acquisition and redevelopment property operating expenses	2,305	1,674	(631)
Property operating expenses	$21,424	$20,008	$(1,416)

Same-asset property expenses of $19,119 for the quarter ended March 31, 2011 increased by $785 or 4.3% from the quarter ended March 31, 2010 due primarily to increased recoverable property taxes and snow clearing costs offset in part by reduced non-recoverable costs.

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Same-asset property NOI	$29,855	$29,430	$425
Acquisition and redevelopment property NOI	5,039	1,920	3,119
Property NOI	$34,894	$31,350	$3,544

Property NOI is calculated as property revenue less property operating expenses. Same-asset NOI for the quarter ended March 31, 2011 increased by $425 or 1.4% from the quarter ended March 31, 2010. Crombie's acquisition activity accelerated as 2010 progressed resulting in significant growth in property operating results in the first quarter of 2011 compared to 2010. Several redevelopment projects were completed during 2010 resulting in improved property NOI in the first quarter of 2011 compared to 2010.

Property NOI on a cash basis is as follows:

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Property NOI	$34,894	$31,350	$3,544
Non-cash straight-line rent	(828)	(958)	130
Non-cash tenant incentive amortization	1,346	1,026	320
Property Cash NOI	35,412	31,418	3,994
Acquisition and redevelopment property cash NOI	5,086	1,954	(3,132)
Same-Asset Property Cash NOI	$30,326	$29,464	$862

Property NOI, on a cash basis, excludes straight-line rent recognition and amortization of tenant incentive amounts. The $862 or 2.9% increase in same-asset cash NOI for the quarter ended March 31, 2011 over March 31, 2010 is primarily the result of increased average net rent per square foot results from 2011 leasing activity.

Management emphasizes property NOI on a cash basis as it reflects the cash generated by the properties period-over-period. This excludes the non-cash items, straight-line rent and amortization of tenant incentives, which are impacting property NOI.

Acquisition and redevelopment property cash NOI is as follows:

	Quarter Ended	
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010
Acquisition property cash NOI	$3,292	$244
Redevelopment property cash NOI	1,794	1,710
	$5,086	$1,954

Cash NOI for redevelopment properties increased 4.9% for the quarter ended March 31, 2011 over the quarter ended March 31, 2010 as a result of completed redevelopment properties offset in part by redevelopment work at Sydney Shopping Centre in Sydney, Nova Scotia which includes short term displacement of GLA and tenants.
Change in cash NOI from redevelopment properties period over period is impacted by the timing of commencement and completion of each redevelopment project. The nature and extent of redevelopment projects results in operations being impacted minimally in some instances and a significant disruption in others, thus affecting the comparability of period-over-period redevelopment operating results.

Crombie undertakes redevelopment of properties to position them for long term sustainability and growth in cash NOI resulting in improvement in value.

Property NOI for the quarter ended March 31, 2011 by province was as follows:

	2011				2010	
(In thousands of CAD dollars)	Property Revenue	Property Expenses	Property NOI	NOI % of revenue	NOI % of revenue	Variance
Nova Scotia	$23,028	$10,288	$12,740	55.3%	57.2%	(1.9)%
New Brunswick	7,010	3,040	3,970	56.6%	53.0%	3.6%
Ontario	9,037	3,158	5,879	65.1%	64.3%	0.8%
Newfoundland and Labrador	8,747	2,742	6,005	68.7%	67.6%	1.1%
Quebec	5,001	1,482	3,519	70.4%	70.6%	(0.2)%
Prince Edward Island	1,315	380	935	71.1%	70.1%	1.0%
Saskatchewan	948	268	680	71.8%	69.8%	2.0%
Alberta	1,232	66	1,166	94.6%	N/A%	N/A%
Total	$56,318	$21,424	$34,894	62.0%	61.0%	1.0%

The increase in NOI as a percentage of revenue in New Brunswick and Saskatchewan is primarily due to acquisitions. The decrease in NOI as a percentage of revenue in Nova Scotia is attributable to redevelopment at Sydney Shopping Centre in Sydney and expiring leases in Halifax Developments in Halifax, Nova Scotia offset in part by 2010 acquisitions.

General and Administrative Expenses

The following table outlines the major categories of general and administrative expenses.

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Salaries and benefits	$1,322	$1,383	$61
Professional fees	381	335	(46)
Public company costs	291	323	32
Rent and occupancy	244	187	(57)
Other	262	295	33
General and administrative expenses	$2,500	$2,523	$23
As a percentage of property revenue	4.4%	4.9%	(0.5)%

General and administrative expenses, as a percentage of property revenue decreased by 0.5% for the quarter ended March 31, 2011 when compared to the same period in 2010. The decrease was caused by:

- Salaries and benefits decreased due to the finalization of costs in the first quarter of 2010 associated with the 2009 retirement of Crombie's Chief Executive Officer.
- Professional fees increased due to increased legal fees, consulting fees associated with employment and retirement compensation analysis offset by decreasing costs associated with IFRS transition.
- Public company costs decreased partially due to a decrease in trustee travel cost.
- Rent and occupancy increased mainly due to increases in office related costs including rent and supplies.

Finance Costs - Operations

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Same-asset finance costs	$11,659	$11,471	$(188)
Acquisition and redevelopment finance costs	2,013	675	(1,338)
Amortization of effective swaps and deferred financing charges	1,739	1,384	(355)
Finance costs – operations	$15,411	$13,530	$(1,881)

Same-asset finance costs for the quarter ended March 31, 2011 increased by $188 or 1.6% compared to the quarter ended March 31, 2010.

There is an agreement between ECLD and Crombie whereby ECLD provides a monthly interest rate subsidy to Crombie to reduce the effective interest rates to 5.54% for the remaining term of certain mortgages that were assumed at Crombie's IPO. The remaining mortgage terms mature through April 2022, and management expects to realize a further $5,747 over that period. The amount of interest rate subsidy received during the quarter ended March 31, 2011 was $358 (quarter ended March 31, 2010 - $507). The reduced

subsidy during 2011 relates to the maturity of the Halifax Developments mortgages. The interest rate subsidy is received by Crombie through monthly repayments by ECLD of amounts due under one of the demand notes issued by ECLD to Crombie Developments Limited ("CDL").

Growth in acquisition and redevelopment finance costs is consistent with Crombie's significant acquisition activity in 2010.

Amortization of effective swaps and deferred financing charges has been impacted by the increase in amortization of effective swap agreements from $827 in 2010 to $1,054 in 2011.

Depreciation and Amortization

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Same-asset depreciation and amortization	$6,416	$7,736	$1,320
Acquisition and redevelopment depreciation and amortization	1,341	386	(955)
Depreciation and amortization	$7,757	$8,122	$365

Same-asset depreciation and amortization of $6,416 for the quarter ended March 31, 2011 was $1,320 or 17.1% lower than the quarter ended March 31, 2010 due primarily to intangible assets related to tenant relationships and components of the buildings associated with properties purchased at the date of IPO being fully amortized. Depreciation and amortization consists of:

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Depreciation of investment properties	$6,301	$6,090	$(211)
Amortization of intangible assets	1,334	1,943	609
Amortization of deferred leasing costs	122	89	(33)
Depreciation and amortization	$7,757	$8,122	$365

Income Taxes

A trust that satisfies the criteria of a REIT throughout its taxation year will not be subject to income tax in respect of distributions to its unitholders that would otherwise apply to trusts classified as specified investment flow-through entities ("SIFTs").

Crombie has organized its assets and operations to satisfy the criteria contained in the Income Tax Act (Canada) in regard to the definition of a REIT. Crombie's management and its advisors have completed an extensive review of Crombie's organizational structure and operations to support Crombie's assertion that it met the REIT criteria throughout the 2009 and 2010 fiscal years. The relevant tests apply throughout the taxation year of Crombie and as such the actual status of Crombie for any particular taxation year can only be ascertained at the end of the year.

The deferred income tax liability represents the future tax provision for CDL, the wholly-owned corporate subsidiary which is subject to income taxes.

Sector Information

While Crombie does not distinguish or group its operations on a geographical or other basis, Crombie provides the following sector information as supplemental disclosure. Sector information for the quarter ended March 31, 2010 has been restated for comparative purposes for property reclassifications.

Retail - Freestanding Properties

	Quarter Ended March 31, 2011			Quarter Ended March 31, 2010		
(In thousands of CAD dollars, except as otherwise noted)	Same-Asset	Acquisitions & Redevelopments	Total	Same-Asset	Acquisitions & Redevelopments	Total
Property revenue	$6,208	$1,905	$8,113	$6,094	$227	$6,321
Property operating expenses	1,242	114	1,356	1,110	43	1,153
Property NOI	$4,966	$1,791	$6,757	$4,984	$184	$5,168
NOI Margin %	80.0%	94.0%	83.3%	81.8%	81.1%	81.7%
Occupancy %	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%

Same-asset retail freestanding property expenses increased due to the timing of payment for property taxes, resulting in a decrease in the overall NOI Margin %.

Retail - Plaza Properties

	Quarter Ended March 31, 2011			Quarter Ended March 31, 2010		
(In thousands of CAD dollars, except as otherwise noted)	Same-Asset	Acquisitions & Redevelopment	Total	Same-Asset	Acquisitions & Redevelopments	Total
Property revenue	$18,427	$3,263	$21,690	$17,933	$1,036	$18,969
Property operating expenses	6,295	1,042	7,337	5,989	360	6,349
Property NOI	$12,132	$2,221	$14,353	$11,944	$676	$12,620
NOI Margin %	65.8%	68.1%	66.2%	66.6%	65.3%	66.5%
Occupancy %	95.8%	98.7%	96.3%	96.2%	95.8%	96.2%

Same-asset property revenue increased compared with 2010 as a result of higher recoverable expenses. Same-asset property expenses increased primarily due to increases in property taxes in Nova Scotia and increased snow clearing costs.

Retail - Enclosed Properties

	Quarter Ended March 31, 2011			Quarter Ended March 31, 2010		
(In thousands of CAD dollars, except as otherwise noted)	Same-Asset	Acquisitions & Redevelopment	Total	Same-Asset	Acquisitions & Redevelopments	Total
Property revenue	$11,065	$1,043	$12,108	$10,668	$1,283	$11,951
Property operating expenses	4,166	650	4,816	4,128	727	4,855
Property NOI	$6,899	$393	$7,292	$6,540	$556	$7,096
NOI Margin %	62.3%	37.7%	60.2%	61.3%	43.3%	59.4%
Occupancy %	94.8%	93.1%	94.6%	93.0%	91.8%	92.8%

Same-asset property revenue increased due to improved occupancy resulting in increased NOI margin percent. NOI margin percent of 37.7% is mainly due to the ongoing redevelopment work at Sydney Mall in Sydney, Nova Scotia.

Office Properties

	Quarter Ended March 31, 2011			Quarter Ended March 31, 2010		
(In thousands of CAD dollars, except as otherwise noted)	Same-Asset	Acquisitions & Redevelopment	Total	Same-Asset	Acquisitions & Redevelopments	Total
Property revenue	$5,346	$--	$5,346	$5,278	$--	$5,278
Property operating expenses	3,251	--	3,251	3,154	--	3,154
Property NOI	$2,095	$--	$2,095	$2,124	$--	$2,124
NOI Margin %	39.2%	--%	39.2%	40.2%	--%	40.2%
Occupancy %	84.3%	--%	84.3%	87.4%	--%	87.4%

Same-asset property revenue increased due to higher tenant recoveries as a result of increased recoverable expenses. This was offset by a decrease in base rent as a result of the decrease in occupancy.

Mixed - Use Properties

	Quarter Ended March 31, 2011			Quarter Ended March 31, 2010		
(In thousands of CAD dollars, except as otherwise noted)	Same-Asset	Acquisitions & Redevelopment	Total	Same-Asset	Acquisitions & Redevelopments	Total
Property revenue	$7,950	$1,111	$9,061	$7,791	$1,048	$8,839
Property operating expenses	4,164	500	4,664	3,952	545	4,497
Property NOI	$3,786	$611	$4,397	$3,839	$503	$4,342
NOI Margin %	47.6%	55.0%	48.5%	49.3%	48.0%	49.1%
Occupancy %	94.4%	95.9%	94.8%	94.4%	95.9%	94.7%

Same-asset property revenue increased primarily due to improved rental revenue at Park Lane retail and Scotia Square Mall in Halifax, Nova Scotia and increases in recoveries. Same-asset property expenses increased due to property tax increases primarily at the Halifax Developments properties and increases in other recoverable expenses.

OTHER 2011 PERFORMANCE MEASURES

Per Unit Measures

In order to provide a comparative measure of operating results on a per unit basis, Crombie is providing the following non-IFRS measures:

	Quarter ended March 31	
(In thousands of CAD dollars, except as otherwise noted)	2011	2010
Operating income attributable to Unitholders	$9,326	$7,175
Operating income attributable to Unitholders per unit – Basic	$0.14	$0.12
Operating income attributable to Unitholders per unit - Diluted	$0.14	$0.12
FFO – Basic	$16,983	$15,297
FFO – Diluted	$19,324	$17,524
FFO per Unit – Basic	$0.26	$0.25
FFO per Unit – Diluted	$0.25	$0.24
AFFO – Basic	$15,259	$13,087
AFFO – Diluted	$17,082	$14,415
AFFO per Unit – Basic	$0.23	$0.22
AFFO per Unit – Diluted	$0.22	$0.21

Operating income attributable to Unitholders is determined before deducting financing costs distributions to Unitholders and represents the most equivalent measure to net income available to all Unitholders, had the Units been classified as equity instruments.

The diluted FFO and AFFO are adjusted by adding back the finance costs on any convertible debenture series that is dilutive for the reporting period for that specific calculation.

Weighted average number of Units outstanding for per unit measures calculations:

	Quarter ended March 31	
	2011	2010
Basic number of Units for all measures	66,048,350	60,806,801
Diluted for operating income attributable to Unitholders purposes	66,226,378	60,974,032
Diluted for FFO purposes	78,471,401	72,708,343
Diluted for AFFO purposes	76,164,863	68,701,305

The diluted weighted average number of Units outstanding does not include the impact of any series of convertible debentures that would be anti-dilutive for that calculation.

Pursuant to CSA Staff Notice 52-306 "(Revised) Non-GAAP Financial Measures", non-GAAP measures should be reconciled to the most directly comparable GAAP measure, which, in the case of Operating income attributable to Unitholders, is Decrease in Net Assets Attributable to Unitholders from the Statement of Comprehensive Income (Loss). The reconciliation is as follows:

	Quarter Ended March 31	
(In thousands of CAD dollars, except as otherwise noted)	2011	2010
Operating income attributable to Unitholders	$9,326	$7,175
Finance costs – distributions to Unitholders	(14,751)	(13,568)
Decrease in net assets attributable to Unitholders	$(5,425)	$(6,393)

FFO and AFFO

FFO and AFFO are not measures recognized under IFRS and do not have standardized meanings prescribed by IFRS. As such, these non-IFRS financial measures should not be considered as an alternative to Operating income attributable to Unitholders, cash provided by operating activities or any other measure prescribed under IFRS. FFO represents a supplemental non-IFRS industry-wide financial measure of a real estate organization's operating performance. AFFO is presented in this MD&A because management believes this non-IFRS measure is relevant to the ability of Crombie to earn and distribute returns to unitholders. FFO and AFFO as computed by Crombie may differ from similar computations as reported by other REIT's and, accordingly, may not be comparable to other such issuers.

Funds from Operations (FFO)

Crombie has calculated FFO in accordance with the recommendations of the Real Property Association of Canada ("REALpac") and defines FFO as increase (decrease) in net assets attributable to Unitholders (computed in accordance with IFRS), excluding gains (or losses) from sales of depreciable real estate and extraordinary items, plus depreciation and amortization expense, deferred income taxes, finance costs – distributions to Unitholders and after adjustments for equity-accounted entities and non-controlling interests. Crombie's method of calculating FFO may differ from other issuers' methods and accordingly may not be directly comparable to FFO reported by other issuers. A calculation of FFO for the quarter ended March 31, 2011 and March 31, 2010 is as follows:

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Decrease in net assets attributable to Unitholders	$(5,425)	$(6,393)	$968
Add (deduct):			
Finance costs – distributions to Unitholders	14,751	13,568	1,183
Depreciation of investment properties	6,301	6,090	211
Amortization of intangible assets	1,334	1,943	(609)
Amortization of deferred leasing costs	122	89	33
Income taxes – deferred	(100)	--	(100)
FFO	$16,983	$15,297	$1,686

The increase in FFO for the quarter ended March 31, 2011 was primarily due to higher NOI from the 2010 acquisition properties offset in part by higher finance costs related to those acquisitions.

Adjusted Funds from Operations (AFFO)

Crombie considers AFFO to be a measure useful in evaluating the recurring economic performance of Crombie's operating activities which will be used to support future distribution payments. AFFO reflects cash available for distribution after the provision for non-cash adjustments to revenue, maintenance capital expenditures, maintenance tenant incentives ("TI") and leasing costs and any settlement of effective interest rate swap agreements.

Maintenance capital expenditures, Maintenance tenant incentives and Leasing costs

Crombie's policy has been to track actual expenditures on these three cost categories and assess whether there was productive capacity enhancement from the costs incurred. To the extent that the expenditures did not provide productive capacity enhancement, they were charged against AFFO. This has lead to volatility in reported AFFO from quarter to quarter as costs are generally not incurred on a consistent basis during the year, or from year to year. In addition, the costs incurred in one reporting period do not necessarily reflect the period of benefit derived from that cost.

In order to better reflect the impact of maintenance costs on AFFO, Crombie is now charging AFFO with a normalized rate per square foot for all of these expenditures. Crombie has chosen a rate of $1.10 per square foot to be charged against AFFO for 2010 and 2011. The rate will be reviewed periodically and adjusted if required. The rate will be a proxy for actual historic costs, anticipated future costs and any significant changes in the nature and age of the properties in the portfolio as it evolves over time. Crombie will continue to track and report actual expenditures for comparative purposes.

The calculation of AFFO for the quarter ended March 31, 2011 and 2010 is as follows:

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
FFO	$16,983	$15,297	$1,686
Add:			
Amortization of effective swap agreements	1,054	827	227
Amortization of tenant incentives	1,346	1,026	320
Deduct:			
Straight-line rent adjustment	(828)	(958)	130
Maintenance expenditures on a square footage basis	(3,296)	(3,105)	(191)
AFFO	$15,259	$13,087	$2,172

The AFFO for the quarter ended March 31, 2011 was $15,259, an increase of $2,172 or 16.6% over the same period in 2010, due primarily to the improved FFO results as previously discussed.

Pursuant to CSA Staff Notice 52-306 "(Revised) Non-GAAP Financial Measures", non-GAAP measures such as AFFO should be reconciled to the most directly comparable IFRS measure, which is interpreted to be the cash flow from operating activities. The reconciliation is as follows:

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Cash provided by operating activities	$8,993	$10,524	$(1,531)
Add back (deduct):			
Finance costs – distributions to Unitholders	14,751	13,568	1,183
Change in other non-cash operating items	(4,489)	(7,331)	2,842
Unit-based compensation expense	(15)	(12)	(3)
Amortization of deferred financing charges	(685)	(557)	(128)
Maintenance expenditures on a square footage basis	(3,296)	(3,105)	(191)
AFFO	$15,259	$13,087	$2,172

The following provides an analysis of the impact of the transition to IFRS on previously reported non-IFRS measures included in this MD&A.

Quarter ended March 31, 2010

FFO, as previously reported	$17,056
Adjustments:	
Amortization of above-market leases	781
Amortization of below-market leases	(1,619)
Amortization of tenant incentives	(1,026)
Accretion of Notes receivable	105
FFO, as currently reported	$15,297

AFFO, as previously reported	$12,744
Adjustments:	
Maintenance expenditures on a square footage basis	(3,105)
Maintenance capital expenditures, actual	2,693
Maintenance TI and leasing costs, actual	650
Accretion of Notes receivable	105
AFFO, as currently reported	$13,087

Amortization of above-market and below-market leases was previously included in the determination of property revenue, and thus impacted the calculation of FFO. Under IFRS, these amounts are not recognized as separate intangible assets and their amount, if any, is included in the determination of the total value of investment properties with their depreciation included in depreciation of investment properties. These amounts do not impact the calculation of AFFO.

Amortization of tenant incentives is now recognized in the determination of property revenue, and thus impacts the determination of FFO. This amount does not impact the calculation of AFFO.

On transition to IFRS, Crombie present valued the long-term note receivable. The note receivable is being accreted with the interest income being recognized as an offset to finance costs – operations. The accretion increases the previously reported FFO and AFFO.

As previously discussed, Crombie is now charging AFFO with a rate per square foot for maintenance expenditures. The impact of this change on previously reported AFFO for the quarter ended March 31, 2011 is as follows:

AFFO increase	$238
AFFO per unit, basic	$0.01
AFFO per unit, diluted	$--
AFFO payout ratio (103.7% vs 105.6% previously)	1.9%

LIQUIDITY AND CAPITAL RESOURCES

Sources and Uses of Funds

Cash flow generated from operating the property portfolio represents the primary source of liquidity used to service the finance costs on debt, fund general and administrative expenses, reinvest in the portfolio through capital expenditures, as well as fund TI costs and distributions. In addition, Crombie has the following sources of financing available to finance future growth: secured short-term financing through an authorized revolving credit facility of up to $150,000, of which $50,000 was drawn at March 31, 2011, and the issue of new equity, mortgage debt on unencumbered assets, and unsecured convertible debentures pursuant to the Declaration of Trust.

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Cash provided by (used in):			
Operating activities	$8,993	$10,524	$(1,531)
Financing activities	$(5,689)	$50,223	$(55,912)
Investing activities	$(6,994)	$(57,886)	$50,892

Operating Activities

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Cash provided by (used in):			
Net assets attributable to Unitholders and non-cash items	$4,504	$3,193	$1,311
Non-cash operating items	4,489	7,331	(2,842)
Cash provided by operating activities	$8,993	$10,524	$(1,531)

Fluctuations in cash provided by operating activities are largely influenced by the change in non-cash working capital which can be affected by the timing of receipts and payments.

Financing Activities

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Cash provided by (used in):			
Net issue of convertible debentures	$--	$42,713	$(42,713)
Net issue (repayment) of loans and borrowings	(6,110)	7,001	(13,111)
Other items (net)	421	509	(88)
Cash provided by (used in) financing activities	$(5,689)	$50,223	$(55,912)

Cash from financing activities in the quarter ended March 31, 2011 decreased by $55,912 over the quarter ended March 31, 2010. During the first quarter of 2010, Crombie raised cash through the issuance of convertible debentures and mortgage refinancing to finance the acquisitions of investment properties.

Investing Activities

	Quarter Ended		
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010	Variance
Cash provided by (used in):			
Acquisition of investment properties	$--	$(51,610)	$51,610
Additions to investment properties	(4,181)	(5,580)	1,399
Additions to tenant incentives	(2,634)	(713)	(1,921)
Additions to deferred leasing costs	(199)	--	(199)
Other items (net)	20	17	3
Cash provided by (used in) investing activities	$(6,994)	$(57,886)	$50,892

Cash used in investing activities for the quarter ended March 31, 2011 was $6,994. During the first quarter of 2010, Crombie acquired $51,610 in investment properties.

Tenant Improvement and Capital Expenditures

There are two types of TI and capital expenditures:

- maintenance TI and leasing costs and maintenance capital expenditures that maintain existing productive capacity; and
- productive capacity enhancement expenditures.

Maintenance TI and leasing costs and maintenance capital expenditures are reinvestments in the portfolio to maintain the productive capacity of the existing assets. These costs are capitalized and depreciated or charged against revenues over their useful lives and deducted when calculating AFFO.

Productive capacity enhancement expenditures are costs incurred that increase the property level NOI, or expand the GLA of a property by a minimum threshold, or otherwise enhance the property's overall value. Productive capacity enhancement expenditures are capitalized and depreciated or charged against revenue over their useful lives, but not deducted when calculating AFFO.

Obligations for expenditures for TI's occur when renewing existing tenant leases or for new tenants occupying a new space. Typically, leasing costs for existing tenants are lower on a per square foot basis than for new tenants. However, new tenants may provide more overall cash flow to Crombie through higher rents or improved traffic to a property. The timing of such expenditures fluctuates depending on the satisfaction of contractual terms contained in the leases.

	Quarter Ended	
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010
Total additions to investment properties	$4,181	$5,580
Less: amounts recoverable from ECLD	--	--
Net additions to investment properties	4,181	5,580
Less: productive capacity enhancements	(2,187)	(2,434)
Maintenance capital expenditures	**$1,994**	**$3,146**

	Quarter Ended	
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010
Total additions to TI and leasing costs	$2,833	$713
Less: amounts recoverable from ECLD	--	(63)
Net additions to TI and leasing costs	2,833	650
Less: productive capacity enhancements	(741)	--
Maintenance TI and leasing costs	**$2,092**	**$650**

As maintenance TI and capital expenditures are not incurred or paid for evenly throughout the fiscal year, there can be comparative volatility from period-to-period.

Maintenance capital expenditures for the quarter ended March 31, 2011 are primarily payments for ongoing parking deck and structural repairs at the Scotia Square parkade in Halifax, Nova Scotia, roof replacements, and building exterior maintenance.

Maintenance TI and leasing costs are the result of both lease renewals and new leases and is reflective of the increased leasing activity during the quarter.

Productive capacity enhancements during the quarter ended March 31, 2011 consisted primarily of redevelopment work on Sydney Shopping Centre in Sydney, Nova Scotia; expansion underway at Taunton & Wilson Plaza in Oshawa, Ontario and expansion underway at Baie Comeau, Quebec.

Capital Structure

(In thousands of CAD dollars)	March 31, 2011		December 31, 2010		March 31, 2010	
Investment property debt	$793,349	55.1%	$799,127	55.1%	$722,017	54.0%
Convertible debentures	146,272	10.1%	148,433	10.3%	153,839	11.5%

	$1,440,505	100.0%	$1,449,535	100.0%	$1,337,120	100.0%

Bank Credit Facilities and Investment Property Debt

Crombie has in place an authorized floating rate revolving credit facility of up to $150,000 (the "Revolving Credit Facility"), $50,000 of which was drawn as at March 31, 2011. The Revolving Credit Facility is secured by a pool of first and second mortgages on certain properties. The floating interest rate is based on specified margins over prime rate or bankers acceptance rates. The specified margin increases as Crombie's overall debt leverage increases. Funds available for drawdowns pursuant to the Revolving Credit Facility, are determined with reference to the value of the Borrowing Base (as defined under "Borrowing Capacity and Debt Covenants") relative to certain financial covenants of Crombie. As at March 31, 2011, Crombie had sufficient Borrowing Base to permit $150,000 of funds to be drawn down pursuant to the Revolving Credit Facility, subject to certain other financial covenants. See "Borrowing Capacity and Debt Covenants".

As of March 31, 2011, Crombie had fixed rate mortgages outstanding of $743,739 ($749,657 after including the fair value debt adjustment of $5,918), carrying a weighted average interest rate of 5.77% (after giving effect to the interest rate subsidy from ECLD under an omnibus subsidy agreement) and a weighted average term to maturity of 7.2 years.
From time to time, Crombie has entered into interest rate swap agreements to manage the interest rate profile of its current or future debts without an exchange of the underlying principal amount (see "Risk Management").

Principal repayments of the debt are scheduled as follows:

(In thousands of CAD dollars)	Maturing Debt Balances						
12 Months ending	Fixed Rate Debt	Floating Rate Debt	Total	% of Total	Payments of Principal	Total Required Payments	% of Total
March 31, 2012	$26,786	$50,000	$76,786	13.0%	$22,672	$99,458	12.5%
March 31, 2013	--	--	--	--%	23,940	23,940	3.0%
March 31, 2014	78,073	--	78,073	13.2%	24,705	102,778	13.0%
March 31, 2015	29,300	--	29,300	5.0%	22,211	51,511	6.5%
March 31, 2016	51,119	--	51,119	8.6%	21,739	72,858	9.2%
Thereafter	356,157	--	356,157	60.2%	87,037	443,194	55.8%
Total [(1)]	$541,435	$50,000	$591,435	100.0%	$202,304	$793,739	100.0%

(1) Excludes fair value debt adjustment of $5,918 and deferred financing costs of $6,308.

Of the maturing debt balances, 19.4% of fixed rate debt, and 26.2% of total maturing debt balances matures over the next three years. This prudent debt management, coupled with the long-term nature of our lease portfolio, provides stability to Crombie's cash flow and minimizes interest rate risk on maturing debt.

Convertible debentures

(In thousands of CAD dollars)	Series A	Series B	Series C
Issue value	$30,000	$85,000	$45,000
Outstanding amount as at March 31, 2011	$29,985	$75,749	$45,000
Annual interest rate (payable semi-annually)	7.00%	6.25%	5.75%
Conversion price per unit	$13.00	$11.00	$15.30
Issue date	March 20, 2008	September 30, 2009	February 8, 2010
Maturity date	March 20, 2013	June 30, 2015	June 30, 2017
Trading symbol	CRR.DB	CRR.DB.B	CRR.DB.C

On February 8, 2010, Crombie issued $45,000 in convertible unsecured subordinated debentures (the "Series C Debentures"). The proceeds were used to reduce the Revolving Credit Facility.

The Series A Debentures, the Series B Debentures and the Series C Debentures (collectively the "Debentures") pay interest semi-annually on June 30 and December 31 of each year and Crombie has the option to pay interest on any interest payment date by issuing REIT units and applying the proceeds to satisfy its interest obligation.

The Debentures are convertible into REIT Units at the option of the debenture holder at any time up to the maturity date, at the conversion price indicated in the table above, being a conversion rate of approximately 76.9231 REIT Units per one thousand dollars principal amount of Series A Debentures, 90.9091 REIT Units per one thousand dollars principal amount of Series B Debentures, and 65.3595 REIT Units per one thousand dollars principal amount of Series C Debentures. If all conversion rights attaching to the March 31, 2011 outstanding Series A Debentures, Series B Debentures and the Series C Debentures are exercised, Crombie would be required to issue approximately 2,306,538 REIT Units, 6,886,273 REIT Units and 2,941,176 REIT Units respectively, subject to anti-dilution adjustments.

The following represents debentures converted from date of issue to April 30, 2011:

(In thousands of CAD dollars)

Conversion date	Convertible debenture series	Debentures face value	Units issued
January through December 2010	Series A	$15	1.153
January through December 2010	Series B	6,737	612,448
Conversions to December 31, 2010		6,752	613,601
January 2011	Series B	850	77,272
February 2011	Series B	1,594	144,905
March 2011	Series B	70	6,363
Conversions to March 31, 2011		9,266	842,141
April 2011	Series B	580	52,726
Conversions to April 30, 2011		$9,846	894,867

For the first three years from the date of issue, there is no ability to redeem the Debentures, after which, each series of Debentures has a period, lasting one year, during which the Debentures may be redeemed, in whole or in part, on not more than 60 days' and not less than 30 days' prior notice, at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, provided that the volume-weighted average trading price of the REIT Units on the TSX for the 20 consecutive trading days ending on the fifth trading day preceding the date on which notice on redemption is given exceeds 125% of the conversion price. After the end of the four year period from the date of issue, and to the maturity date, the Debentures may be redeemed, in whole or in part, at anytime at the redemption price equal to the principal amount thereof plus accrued and unpaid interest. Provided that there is not a current event of default, Crombie will have the option to satisfy its obligation to pay the principal amount of the Debentures at maturity or upon redemption, in whole or in part, by issuing the number of REIT units equal to the principal amount of the Debentures then outstanding divided by 95% of the volume-weighted average trading price of the REIT units for a stipulated period prior to the date of redemption or maturity, as applicable. Upon change of control of Crombie, Debenture holders have the right to put the Debentures to Crombie at a price equal to 101% of the principal amount plus accrued and unpaid interest.

Transaction costs related to the Debentures have been deferred and are being amortized into finance costs – operations over the term of the Debentures using the effective interest method.

REIT Units and Class B LP Units and the attached Special Voting Units

In March 2011 there were 21,417 REIT Units awarded as part of the Employee Unit Purchase Plan (March 2010 – 17,157 REIT Units). For the quarter ended March 31, 2011, a total of $2,514 of 6.25% Series B Convertible Unsecured Subordinated Debentures were converted for a total of 228,540 REIT units.

On August 4, 2010, Crombie closed a public offering, on a bought deal basis, of 2,670,000 REIT Units at a price of $11.05 per REIT Unit for gross proceeds of $29,504. Concurrently with the issue of the REIT Units, in satisfaction of its pre-emptive right, ECLD subscribed for 1,855,000 Class B LP Units and the attached Special Voting Units at a price of $11.05 per Class B LP Unit for gross proceeds of $20,498, on a private placement basis.

Total units outstanding at April 30, 2011 were as follows:

Units	35,630,583
Special Voting Units [(1)]	30,780,730

(1) Crombie Limited Partnership, a subsidiary of Crombie, has also issued 30,780,730 Class B LP Units. These Class B LP units accompany the Special Voting Units, are the economic equivalent of a Unit, and are convertible into Units on a one-for-one basis.

On March 31, 2011, Crombie announced a normal course issuer bid ("NCIB") where Crombie may purchase for cancellation up to 100,000 of its REIT units, which represents approximately 0.28% of the outstanding REIT units, during the period April 4, 2011 to April 3, 2012. The purchases have to be made through the facilities of the TSX. The price that Crombie will pay for any such REIT units will be the market price at the time of acquisition. Under the TSX policies, Crombie is entitled to purchase a maximum of 14,387 REIT units per trading day. Crombie had a previous NCIB which expired March 25, 2011. Under that NCIB, Crombie acquired a total of 50,547 units. During the first three months of 2011, Crombie did not acquire any REIT units under a NCIB.

During the first three months of 2011, $2,514 in Series B Convertible Debentures were converted to a total of 228,540 REIT units at the conversion price of $11.00 per unit.

Taxation of Distributions

Crombie, through its subsidiaries, has a large asset base that is depreciable for Canadian income tax purposes. Consequently, certain of the distributions from Crombie are treated as returns of capital and are not taxable to Canadian resident unitholders for Canadian income tax purposes. The composition for tax purposes of distributions from Crombie may change from year to year, thus affecting the after-tax return to unitholders.

The following table summarizes the history of the taxation of distributions from Crombie:

Taxation Year	Return of Capital	Investment Income	Capital Gains
2006 per $ of distribution	40.0%	60.0%	--
2007 per $ of distribution	25.5%	74.4%	0.1%
2008 per $ of distribution	27.2%	72.7%	0.1%
2009 per $ of distribution	51.0%	49.0%	--
2010 per $ of distribution	64.7%	35.3%	--

Borrowing Capacity and Debt Covenants

Under the amended terms governing the Revolving Credit Facility, Crombie is entitled to borrow a maximum of 70% of the fair market value of assets subject to a first security position and 60% of the excess of fair market value over first mortgage financing of assets subject to a second security position or a negative pledge (the "Borrowing Base"). The Revolving Credit Facility provides Crombie with flexibility to add or remove properties from the Borrowing Base, subject to compliance with certain conditions. The terms of the Revolving Credit Facility also require that Crombie must maintain certain coverage ratios above prescribed levels:

- annualized NOI for the prescribed properties must be a minimum of 1.4 times the coverage of the related annualized debt service requirements;
- annualized NOI on all properties must be a minimum of 1.4 times the coverage of all annualized debt service requirements; and
- distributions to Unitholders are limited to 100% of Distributable Income as defined in the revolving credit facility.

Should ECLD reduce its voting interest below 40%, Crombie will be required to renegotiate the Revolving Credit Facility or obtain alternative financing. Pursuant to an exchange agreement and while such voting interest threshold remains in place, ECLD will be required to give Crombie at least six months' prior written notice of its intention to reduce its voting interest below 40%. ECLD's voting interest is 46.4% (fully diluted 40.4%) as at March 31, 2011.

The Revolving Credit Facility also contains a covenant limiting the amount which may be utilized under the Revolving Credit Facility at any time. This covenant provides that the aggregate of amounts drawn under the Revolving Credit Facility plus any negative mark-to-market position on any interest rate swap agreements or other hedging instruments plus any outstanding letters of credit may not exceed the "Aggregate Coverage Amount", which is based on a modified calculation of the Borrowing Base, as defined in the Revolving Credit Facility.

At March 31, 2011, the remaining amount available under the Revolving Credit Facility was $100,000 (prior to reduction for standby letters of credit outstanding and negative mark-to-market position on interest rate swap agreements) and was not limited by the Aggregate Coverage Amount.

At March 31, 2011, Crombie remained in compliance with all debt covenants.

Debt to Gross Book Value

When calculating debt to gross book value, debt is defined under the terms of the Declaration of Trust as bank loans plus investment property debt and convertible debentures. Gross book value means, at any time, the book value of the assets of Crombie and its consolidated subsidiaries plus deferred financing charges, accumulated depreciation and amortization in respect of Crombie's properties (and related intangible assets) less (i) the amount of any receivable reflecting interest rate subsidies on any debt assumed by Crombie and (ii) the amount of deferred income tax liability arising out of the fair value adjustment in respect of the indirect acquisitions of certain properties. If approved by a majority of the independent trustees, the appraised value of the assets of Crombie and its consolidated subsidiaries may be used instead of book value.

The debt to gross book value was 56.0% at March 31, 2011 compared to 56.8% at March 31, 2010. This leverage ratio is below the maximum 60%, or 65% including convertible debentures, as outlined by Crombie's Declaration of Trust. On a long-term basis, Crombie intends to maintain overall indebtedness, including convertible debentures, in the range of 50% to 60% of gross book value, depending upon Crombie's future acquisitions and financing opportunities.

(In thousands of CAD dollars, except as otherwise noted)	As at Mar. 31, 2011	As at Dec. 31, 2010	As at Sep. 30, 2010	As at Jun. 30, 2010	As at Mar. 31, 2010
Fixed rate mortgages	$749,657	$755,665	$733,520	$684,752	$673,481

Gross book value	1,688,186	$1,686,654	$1,662,037	$1,559,310	$1,550,821
Debt to gross book value	56.0%	56.5%	56.4%	57.2%	56.8%
Maximum borrowing capacity[1]	65%	65%	65%	65%	65%

(1) Maximum permitted by the Declaration of Trust

Crombie, through the issuance of convertible debentures, mortgage financings, refinancings and bank debt continues to maintain leverage at an appropriate level while staying conservatively within its maximum borrowing capacity.

Debt and Interest Service Coverage

Crombie's interest and debt service coverage ratios for the quarter ended March 31, 2011 were 2.47 times EBITDA and 1.75 times EBITDA. This compares to 2.46 times EBITDA and 1.74 times EBITDA respectively for the quarter ended March 31, 2010. EBITDA should not be considered an alternative to operating income attributable to Unitholders, cash provided by operating activities or any other measure of operations as prescribed by IFRS. EBITDA is not an IFRS financial measure; however, Crombie believes it is an indicative measure of its ability to service debt requirements, fund capital projects and acquire properties. EBITDA may not be calculated in a comparable measure reported by other entities.

	Quarter Ended	
(In thousands of CAD dollars)	March 31, 2011	March 31, 2010
Property revenue	$56,318	$51,358
Amortization of tenant improvements	1,346	1,026

Debt repayments	$6,008	$166,379
Amortization of fair value debt premium	5	(1)
Payments relating to interest rate subsidy	(358)	(508)
Payments relating to Revolving Credit Facility	--	(51,660)
Balloon payments on mortgages	--	(109,240)
Adjusted debt repayments (3)	$5,655	$4,970
Interest service coverage ratio {(1)/(2)}	2.47	2.46
Debt service coverage ratio {(1)/((2)+(3))}	1.75	1.74

Distributions and Distribution Payout Ratios

Distribution Policy

Pursuant to Crombie's Declaration of Trust, cash distributions are to be determined by the trustees in their discretion. Crombie intends, subject to approval of the Board of Trustees, to make distributions to Unitholders not less than the amount equal to the net income and net realized capital gains of Crombie, to ensure that Crombie will not be liable for income taxes. Crombie, subject to the discretion of the Board of Trustees, targets to make annual cash distributions to Unitholders equal to approximately 95% of its AFFO on an annual basis.

Details of distributions to Unitholders are as follows:

	Quarter Ended	
(Distribution amounts represented in thousands of CAD dollars)	March 31, 2011	March 31, 2010
Distributions to Unitholders	$7,902	$7,132
Distributions to Special Voting Unitholders	6,849	6,436
Total distributions	$14,751	$13,568
FFO payout ratio	86.9%	88.7%
AFFO payout ratio (target ratio = 95%)	96.7%	103.7%

RELATED PARTY TRANSACTIONS

Related party transactions are transactions with associates, post employment benefit plans, and key management personnel.

As at March 31, 2011, Empire, through its wholly-owned subsidiary ECLD, holds a 46.4% (fully diluted 40.4%) indirect interest in Crombie. Certain executive management individuals and other employees of Crombie provide general management, financial, leasing, administrative, and other administration support services to certain real estate subsidiaries of Empire Company Limited on a cost sharing basis pursuant to a Management Cost Sharing Agreement, dated March 23, 2006, between Crombie Developments Limited, a subsidiary of Crombie, and ECLD, a subsidiary of Empire ("Management Cost Sharing Agreement"). The costs assumed by Empire pursuant to the agreement during the three months ended March 31, 2011 were $265 (three months ended March 31, 2010 - $277).

Certain on-site maintenance and management employees of Crombie will provide property management services to certain real estate subsidiaries of Empire on a cost sharing basis pursuant to the Management Cost Sharing Agreement. The costs assumed by Empire pursuant to the Management Cost Sharing Agreement during the three months ended March 31, 2011 were $234 (three months ended March 31, 2010 - $283) and were netted against property expenses. In addition, for various periods, ECLD has an obligation to provide rental income and interest rate subsidies pursuant to an Omnibus Subsidy Agreement dated March 23, 2006 between CDL, CLP and ECLD. The head lease subsidy during the three months ended March 31, 2011 was $143 (three months ended March 31, 2010 - $186) and the interest rate subsidy during the three months ended March 31, 2011 was $358 (three months ended March 31, 2010 - $507).

As of March 31, 2011, Crombie had $5,744 fixed rate second mortgage financings outstanding with Empire. The mortgages have a weighted average interest rate of 5.38% and a maturity date of March 2014. Finance costs paid during the three months ended March 31, 2011 were $77 (three months ended March 31, 2010 - $80).

Crombie also earned rental revenue of $17,538 for the three months ended March 31, 2011 (three months ended March 31, 2010 - $15,009) from Sobeys Inc., Empire Theatres and other subsidiaries of Empire.

Crombie paid $47 in head office rents to ECLD for the three months ended March 31, 2011 (three months ended March 31, 2010 – $47).

During fiscal 2010, Crombie acquired 18 retail properties for a purchase price of $154,823, excluding closing and transaction costs. The properties, contain approximately 780,000 square feet, were acquired from a subsidiaries of Empire Company Limited.

In addition to the above acquisitions, on November 22, 2010, Crombie acquired two retail properties for a purchase price of $17,000, excluding closing and transaction costs. The properties, containing approximately 87,000 square feet, were acquired from a joint venture of which a subsidiary of Empire was a 50% partner.

On February 22, 2010 Crombie repaid $3,471 to ECL General Partner Limited to retire a loan as required under the terms of the agreement.

On August 4, 2010, concurrently with a public offering of REIT units, in satisfaction of its pre-emptive right, ECLD purchased 1,855,000 Class B LP Units and the attached Special Voting Units at a price of $11.05 per Class B LP Unit for proceeds of $20,381 net of issue costs, on a private placement basis

Critical Accounting Estimates

Critical accounting estimates are discussed in the Summary of Significant Accounting Policies note to the March 31, 2011 Interim Consolidated Financial Statements and under the section "Critical Accounting Estimates" in the 2010 Annual Report.

Financial Instruments

The fair value of a financial instrument is the estimated amount that Crombie would receive or pay to settle the financial assets and financial liabilities as at the reporting date.

Crombie has classified its financial instruments in the following categories:

- Held to maturity investments – assets related to discontinued operations
- Loans and receivables – restricted cash, cash, cash equivalents, notes receivable and trade receivable
- Other financial liabilities - investment property debt, liabilities related to discontinued operations, convertible debentures, tenant improvements and capital expenditures payable, property operating costs payable and finance costs payable
- Available for sale – Derivative instruments.

Due to their short-term nature, carrying values of cash and cash equivalents, restricted cash, trade receivables, trade and other payables approximate fair values at the balance sheet date.

The fair value of other financial instruments is based upon discounted future cash flows using discount rates that reflect current market conditions for instruments with similar terms and risks. Such fair value estimates are not necessarily indicative of the amounts Crombie might pay or receive in actual market transactions.

The following table summarizes the carrying value (excluding deferred financing charges) and fair value of those financial instruments which have a fair value different from their book value at the balance sheet date.

	March 31, 2011		March 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets related to discontinued operations	$6,650	$6,760	$6,912	$7,015
Investment property debt	$799,657	$827,577	$727,981	$725,476
Convertible debentures	$150,734	$166,317	$160,000	$170,115
Liabilities related to discontinued operations	$6,129	$6,339	$6,294	$6,222

Crombie uses various methods in estimating the fair value of a financial instrument. The methods used comprise the following inputs:

Level 1 - quoted prices in active markets

Level 2 - inputs other than quoted prices in actives markets that are observable for the asset or liability either directly or indirectly

Level 3 - inputs are not based on observable market data (unobservable inputs)

The following categorizes and summarizes the significant methods and assumptions used in estimating the fair values of the financial instruments reflected in the above table:

Level 1:

Convertible debentures: The fair value of the convertible debentures is estimated based on the market trading prices, at the reporting date, of the convertible debentures.

Assets related to discontinued operations: The fair value of the bonds and treasury bills are based on market trading prices at the reporting date.

Level 3:

Investment property debt and liabilities related to discontinued operations: The fair value of Crombie's investment property debt and liabilities related to discontinued operations is estimated based on the present value of future payments, discounted at the yield on a Government of Canada bond with the nearest maturity date to the underlying debt, plus an estimated credit spread at the reporting date.

COMMITMENTS AND CONTINGENCIES

There are various claims and litigation which Crombie is involved with arising out of the ordinary course of business operations. In the opinion of management, any liability that would arise from such contingencies would not have a significant adverse effect on these financial statements.

Crombie has agreed to indemnify its trustees and officers, and particular employees, in accordance with Crombie's policies. Crombie maintains insurance policies that may provide coverage against certain claims.

Crombie has entered into a management cost sharing agreement with a subsidiary of Empire. Details of this agreement are described in "Related Party Transactions".

Crombie obtains letters of credit to support its obligations with respect to construction work on its Investment properties, defeasing Investment property debt and satisfying mortgage financing requirements. Crombie has $223 in standby letters of credit for construction work that is being performed on its Investment properties. In connection with the defeasance of the discontinued operations Investment property debt, Crombie has issued a standby letter of credit in the amount of $1,715 in favour of the mortgage lender. In addition, to satisfy the requirements of mortgage

financings, Crombie has issued standby letters of credit in the amount of $11,200 in favour of mortgage lenders. Crombie does not believe that any of these standby letters of credit are likely to be drawn upon.

Land leases have varying terms ranging from 14 to 74 years including renewal options. For the three months ended March 31, 2011, Crombie paid $294 in land lease payments to third party landlords (three months ended March 31, 2010 - $242).

As at March 31, 2011, Crombie has signed construction contracts totalling $4,052.

RISK MANAGEMENT

In the normal course of business, Crombie is exposed to a number of financial risks that can affect its operating performance. These risks, and the action taken to manage them, are as set out in Crombie's 2010 annual report, subject to updates as follows:

Credit risk

Credit risk arises from the possibility that tenants may experience financial difficulty and be unable to fulfill their lease commitments. Crombie's credit risk is limited to the recorded amount of tenant receivables. A provision for doubtful accounts is taken for all anticipated collectibility risks.

Crombie mitigates credit risk by geographical diversification, utilizing staggered lease maturities, diversifying both its tenant mix and asset mix and conducting credit assessments for new and renewing tenants. As at March 31, 2011:

- Excluding Sobeys (which accounts for 36.3% of Crombie's minimum rent), no other tenant accounts for more than 2.0% of Crombie's minimum rent, and
- Over the next five years, leases on no more than 9.8% of the GLA area of Crombie will expire in any one year.

Crombie earned rental revenue of $17,538 for the three months ended March 31, 2011 (three months ended March 31, 2010 - $15,009) from subsidiaries of Empire.

Receivables are substantially comprised of current balances due from tenants. The balance of accounts receivables past due is not significant. Generally, rents are due the first of each month and other tenant billings are due 30 days after invoices, and in general balances over 30 days are considered past due. None of the receivable balances are considered impaired.

Provision for doubtful accounts is reviewed at each balance sheet date. A provision is taken on accounts receivable from independent accounts and is recorded as a reduction to its respective receivable account on the balance sheet. Crombie updates its estimate of provision for doubtful accounts based on past due balances on accounts receivable. Current and long-term accounts receivable are reviewed on a regular basis and are provided for when collection is considered unlikely.

	Quarter Ended	
	March 31, 2011	March 31, 2010
Provision for doubtful accounts, beginning of period	$699	$326
Additional provision	149	103
Recoveries	(11)	(15)
Write-offs	(218)	(1)
Provision for doubtful accounts, end of period	$619	$413

Interest rate risk

Interest rate risk is the potential for financial loss arising from increases in interest rates. Crombie mitigates interest rate risk by utilizing staggered debt maturities, limiting the use of permanent floating rate debt and utilizing interest rate swap agreements. As at March 31, 2011:

- Crombie's weighted average term to maturity of the fixed rate mortgages was 7.2 years; and
- Crombie's has a floating rate revolving credit facility available to a maximum of $150,000, with a balance of $50,000 at March 31, 2011. Crombie's exposure to floating rate debt is reduced by a fixed interest rate swap agreement discussed below.

Crombie has entered into interest rate swap agreements to manage the interest rate profile of its current or future debts without an exchange of the underlying principal amount. The breakdown of the swaps in place at March 31, 2011 as part of the interest rate management program, and their associated mark-to-market amounts are as follows:

- Crombie has entered into a fixed interest rate swap to fix the amount of interest being paid on $50,000 of the revolving credit facility. The fair value of the fixed interest rate swap at March 31, 2011, had an unfavourable mark-to-market exposure of $772 (March 31, 2010 – unfavourable $2,398) compared to its face value. The change in this amount has been recognized in other comprehensive (loss) income. The mark-to-market amount of fixed interest rate swap reduces to $Nil upon maturity of the swap in 2011.
- Crombie has entered into a delayed interest rate swap agreement of a notional amount of $8,204 with a settlement date of July 2, 2011 and maturing July 2, 2021 to mitigate exposure to interest rate increases for a mortgage maturing in 2011. The fair value of this delayed interest rate swap agreement had an unfavourable mark-to-market exposure of $1,150 compared to the face value March 31, 2011 (March 31, 2010 – unfavourable $821). The change in this amount has been recognized in other comprehensive income (loss).

Crombie estimated that $3,112 of accumulated other comprehensive income (loss) will be reclassified to finance costs during the remaining three quarters of 2011, based on interest rate swap agreements settled to March 31, 2011.

A fluctuation in interest rates would have had an impact on Crombie's operating income. Based on the previous year's rate changes, a 0.5% interest rate change would reasonably be considered possible. The changes would have had the following impact:

	Three Months Ended Mar. 31, 2011		Three Months Ended Mar. 31, 2010	
	0.5% increase	0.5% decrease	0.5% increase	0.5% decrease
Impact on operating income attributable to Unitholders of interest rate changes on the floating rate revolving credit facility	$(124)	$124	$(33)	$33

	Mar. 31, 2011		Mar. 31, 2010	
	0.5% increase	0.5% decrease	0.5% increase	0.5% decrease
Impact on other comprehensive income due to changes in fair value of derivatives designated as a cash flow hedge	$391	$(408)	$631	$(653)

Crombie does not enter into interest rate swap transactions on a speculative basis. Crombie is prohibited by its Declaration of Trust in purchasing, selling or trading in interest rate future contracts other than for hedging purposes.

Liquidity risk

The real estate industry is highly capital intensive. Liquidity risk is the risk that Crombie may not have access to sufficient debt and equity capital to fund the growth program and/or refinance the debt obligations as they mature.

Cash flow generated from operating the property portfolio represents the primary source of liquidity used to service the interest on debt, fund general and administrative expenses, reinvest into the portfolio through capital expenditures, as well as fund tenant improvement costs and make distributions to Unitholders. Debt repayment requirements are primarily funded from refinancing Crombie's maturing debt obligations. Property acquisition funding requirements are funded through a combination of accessing the debt and equity capital markets.

There is a risk that the debt capital markets may not refinance maturing debt on terms and conditions acceptable to Crombie or at any terms at all. Crombie seeks to mitigate this risk by staggering the debt maturity dates. There is also a risk that the equity capital markets may not be receptive to an equity issue from Crombie with financial terms acceptable to Crombie. Crombie mitigates its exposure to liquidity risk utilizing a conservative approach to capital management.

Access to the Revolving Credit Facility is limited to the amount utilized under the facility, the amount of any outstanding letters of credit plus any unfavourable mark-to-market position on the interest rate swap agreements and cannot exceed the security provided by Crombie. Any deterioration in the mark-to-market position may reduce Crombie's available credit in the revolving credit facility.

The estimated payments, including principal and interest, on non-derivative financial liabilities to maturity date are as follows:

	Contractual Cash Flows[1]	2011	2012	2013	2014	2015	Thereafter
Fixed rate mortgages[2]	$1,004,667	$90,006	$62,891	$139,594	$82,755	$100,522	$528,899
Convertible debentures	191,226	9,421	39,406	7,322	7,322	79,521	48,234
	1,195,893	99,427	102,297	146,916	90,077	180,043	577,133
Floating rate revolving credit	50,291	50,291	--	--	--	--	--
Total	$1,246,184	$149,718	$102,297	$146,916	$90,077	$180,043	$577,133

(1) Contractual cash flows include principal and interest and ignore extension options

(2) Reduced by the interest rate subsidiary payments to be received from ECL

The estimated payments on derivative financial liabilities to maturity dates are as follows:

	Total	2011	2012	2013	2014	2015	Thereafter
Swap agreements	$1,922	$1,922	$--	$--	$--	$--	$--

SUBSEQUENT EVENTS

On April 19, 2011, Crombie declared distributions of 7.417 cents per unit for the period from March 1, 2011 to and including, March 31, 2011. The distributions of $4,926 will be payable on May 16, 2011 to Unitholders of record as at April 30, 2011.

On May 2, 2011, Crombie completed the acquisition of a 73,807 square foot retail property in Red Deer, Alberta from a third party. The acquisition price was $21,850, which represents a capitalization rate of 7.26%. Crombie assumed a mortgage of $10,726 upon closing with the balance of the purchase price being satisfied initially through the revolving credit facility.

On May 2, 2011, Crombie signed purchase and sale agreements on two properties with Empire Company Limited totalling 137,644 square feet of gross leaseable area. These acquisitions are expected to close during the second quarter of 2011. The purchase price is expected to be $27,500, which represents a weighted average capitalization rate of 7.33%. The purchase price will be initially satisfied through a combination of mortgage debt and Crombie's revolving credit facility.

CONTROLS AND PROCEDURES

Crombie maintains a set of disclosure controls and procedures designed to ensure that information required to be disclosed in filings made pursuant to National Instrument 52-109 is recorded, processed, summarized and reported within the time periods specified in the Canadian Securities Administrators' rules and forms. Our Chief Executive Officer and Chief Financial Officer have evaluated the design and effectiveness of our disclosure controls and procedures as of March 31, 2011. They have concluded that our current disclosure controls and procedures are designed to provide, and do operate to provide, reasonable assurance that (i) information required to be disclosed by the Crombie in its annual filings or other reports filed or submitted by it under applicable securities legislation is recorded, processed, summarized and reported within the prescribed time periods, and (ii) material information regarding the Crombie is accumulated and communicated to the Crombie's management, including its Chief Executive Officer and Chief Financial Officer to allow timely decisions regarding required disclosure.

In addition, our Chief Executive Officer and Chief Financial Officer have designed or caused to be designed under their supervision, internal controls over financial reporting ("ICFR") to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes. Further, our Chief Executive Officer and Chief Financial Officer have evaluated, or caused to be evaluated under their supervision, the effectiveness of the design and operation of ICFR at the financial quarter end and have concluded that our current ICFR was effective at the financial quarter end based on that evaluation. There have been no material changes to the Crombie's internal controls during the quarter.

QUARTERLY INFORMATION

The following table shows information for revenues, net income (loss), AFFO, FFO, distributions and per unit amounts for the eight most recently completed quarters.

	Quarter Ended							
(In thousands of CAD dollars, except per unit amounts)	Mar. 31, 2011	Dec. 31, 2010	Sep. 30, 2010	Jun. 30, 2010	Mar. 31, 2010	Dec. 31, 2009	Sep. 30, 2009	Jun. 30, 2009
						(prepared under Canadian GAAP)		
Property revenue	$56,318	$55,693	$51,451	$50,935	$51,358	$52,378	$50,991	$50,893

Basic and diluted net operating income (net income (loss) for GAAP) per unit	$0.14	$0.12	$0.11	$0.10	$0.11	$0.11	$(0.03)	$0.15

	Quarter Ended							
(In thousands of CAD dollars, except per unit amounts)	Mar. 31, 2011	Dec. 31, 2010	Sep. 30, 2010	Jun. 30, 2010	Mar. 31, 2010	Dec. 31, 2009	Sep. 30, 2009	Jun. 30, 2009
AFFO	$15,259	$15,062	$13,666	$12,969	$13,087	$(7,511)	$(451)	$14,524
FFO	$16,983	$16,885	$15,341	$14,790	$15,297	$18,106	$8,948	$18,717
Distributions	$14,751	$14,702	$14,251	$13,569	$13,568	$13,567	$13,566	$12,294
AFFO per unit – basic	$0.23	$0.23	$0.21	$0.21	$0.22	$(0.12)	$(0.01)	$0.27
AFFO per unit – diluted[1]	$0.22	$0.22	$0.21	$0.21	$0.21	$(0.12)	$(0.01)	$0.27
FFO per unit – basic	$0.26	$0.26	$0.24	$0.24	$0.25	$0.30	$0.15	$0.35
FFO per unit - diluted[1]	$0.25	$0.25	$0.23	$0.23	$0.24	$0.28	$0.15	$0.35
Distributions per unit	$0.22	$0.22	$0.22	$0.22	$0.22	$0.22	$0.22	$0.23

(1) FFO and AFFO per unit are calculated on a diluted basis. The diluted weighted average number of total Units and Special Voting Units includes the conversion of all series of convertible debentures outstanding during the period, excluding any series that is anti-dilutive. Distributions per unit for each period are based on the total distributions per unit declared during the specific period.

Variations in quarterly results over the past eight quarters have been influenced by the following specific transactions and ongoing events:

- Property acquisitions – during the quarter ended March 31, 2010, Crombie acquired eight retail properties for a total purchase price of $59,276; during the quarter ended September 30, 2010, acquired nine retail properties for $84,297; and during the quarter ended December 31, 2010, acquired three retail properties for $28,250. The purchase prices exclude closing and transaction costs.
- Property revenue and property operating expenses - Crombie's business is not subject to significant seasonal fluctuations. However, property operating expenses during winter months include such expenses as snow removal, which is a recoverable

expense, thus increasing property revenue during these same periods. Property operating expenses during the summer and fall periods include such expenses as paving and roof repairs.

- General and administrative expenses - for the quarter ended June 30, 2009, general and administrative expenses increased due to onetime costs associated with the retirement of Crombie's Chief Executive Officer. For the quarter ended June 30, 2010, general and administrative expenses increased due to costs associated with the departure of Crombie's Chief Financial Officer.
- Finance costs - operating – finance costs have increased quarter over quarter since March 31, 2009, with pronounced changes in quarters commencing December 31, 2009. In April 2008, Crombie acquired a portfolio of properties for $428,500, increasing lower cost floating rate debt by $343,437 from March 31, 2008 to June 30, 2008. Since that time, Crombie has been replacing the floating rate debt with higher rate fixed rate debt in the form of mortgages and convertible debentures. New mortgage financing and refinancing, as well as the issuance of Series B and Series C Convertible Debentures have brought stability and certainty to Crombie's interest rates and minimized exposure to floating rate debt over the long term. Crombie's floating rate debt as at March 31, 2011 is $50,000 compared with $106,160 as at December 31, 2009. Crombie has maintained an interest rate swap on $50,000 of its floating rate debt, converting the rate to a fixed rate on that portion of its debt.
- Other income (expense) items - in September 2009, Crombie issued $85,000 in Series B Convertible Debentures and used the proceeds to pay down the floating rate term facility. At the time, there was an interest rate swap hedge in place on the floating rate term facility. Due to the conversion option on the Series B Convertible Debentures, the interest rate swap agreement was no longer deemed to be an effective hedge. As a result, Crombie settled an interest rate swap agreement of a notional amount of $84,000 for a settlement amount of $8,139 and recognized this settlement amount as an expense in the quarter ended December 31, 2009. In addition, Crombie wrote off $1,860 of deferred financing charges related to the repaid component of the floating rate term facility.

Per unit amounts for FFO and AFFO are influenced by operating results as detailed above and by the timing of the issuance of REIT Units and Class B LP Units. Crombie had issuances, net of issue costs, of $64,801 in the quarter ended June 30, 2009 and $48,536 in the quarter ended September 30, 2010.

Variations in quarterly results influenced by the change in accounting standards

Effective from January 1, 2010, Crombie's results are reported using IFRS, while reported results prior to that date are prepared using Canadian GAAP. The most significant impacts of the change in accounting standards on the quarterly information are:

- Finance costs – distributions to Unitholders - On transition to IFRS, Crombie's REIT Units and Class B LP Units are classified as financial liabilities, whereas under Canadian GAAP the REIT Units were classified as equity and the Class B LP Units were classified as Non-controlling interest within the equity section. The impact of this change in classification is that distributions paid to Unitholders are considered a finance cost on the financial liabilities.
- Depreciation and amortization - Crombie has chosen the cost method under IFRS for valuation of its investment properties. Crombie elected to adjust certain properties and components of properties to fair value as deemed cost on transition to IFRS. As a result of the election, depreciation and amortization for the quarters reported under IFRS is less than that for the quarters reported under Canadian GAAP. The impact of the change on total depreciation and amortization for the year ended December 31, 2010 was a decrease of $4,562 from the amount previously reported under Canadian GAAP. This decrease is primarily the result of increased land values on transition offset by decreased values for depreciable components of investment properties.
- In addition, the presentation of amortization has changed under IFRS. Previously, amortization of Above-market and Below-market lease intangibles was included in Property revenue, while amortization of Tenant incentives was included in depreciation expenses. Under IFRS, the amounts previously considered Above-market and Below-market lease intangibles are now included in the cost of the building component of Investment properties and a separate Intangible asset is recognized for Tenant relationships. The building is depreciated through Depreciation of investment properties and the amortization of tenant incentives is included in Property revenue versus previously being included in Depreciation and Amortization expense.
- Property revenue - As a result of the change in the presentation of amortization of Above-market and Below-market lease intangibles and the amortization of tenant incentives, Property revenue decreased from the amounts previously reported as follows:

Three months ended:	
March 31, 2010	$1,863
June 30, 2010	$1,876
September 30, 2010	$1,967
December 30, 2010	$1,852

Additional information relating to Crombie, including its latest Annual Information Form, can be found on the SEDAR web site for Canadian regulatory filings at www.sedar.com.

See accompanying notes to the interim consolidated financial statements.

1) GENERAL INFORMATION AND NATURE OF OPERATIONS

Crombie Real Estate Investment Trust ("Crombie") is an unincorporated "open-ended" real estate investment trust created pursuant to the Declaration of Trust dated January 1, 2006, as amended. The principal business of Crombie is the acquisition of retail and office space for purposes of leasing. Crombie is registered in Canada and the address of its registered office is 115 King Street, Stellarton, Nova Scotia, Canada, B0K 1S0. The interim consolidated financial statements for the three months ended March 31, 2011 and March 31, 2010 include the accounts of Crombie and all of its subsidiary entities. The units of Crombie are traded on the Toronto Stock Exchange ("TSX") under the symbol "CRR.UN".

The financial statements were authorized for issue by the Board of Trustees on May 4, 2011.

2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of compliance
These interim consolidated financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34, Interim Financial Reporting. These financial statements reflect part of the period covered by Crombie's first International Financial Reporting Standards ("IFRS") financial statements for the year ending December 31, 2011 and are covered by IFRS 1, First-time Adoption of IFRS. These interim consolidated financial statements may not include all of the information required in annual financial statements in accordance with IFRS.

An explanation of how the transition to IFRS has affected the previously reported balance sheet, total comprehensive income and cash flows of Crombie is provided in Note 26.

(b) Basis of presentation
The interim consolidated financial statements are presented in Canadian dollars ("CAD"), Crombie's reporting currency, rounded to the nearest thousand. The interim consolidated financial statements are prepared on an historical cost basis except for financial assets and liabilities classified as fair value through operating income ("FVTPL") or designated as available for sale ("AFS"), that have been measured at fair value. On transition from Canadian generally accepted accounting principles ("GAAP") to IFRS, effective January 1, 2010, certain investment properties, or components thereof, were re-measured to their fair value, and this fair value was used as the deemed cost of the property on that date.

(c) Presentation of financial statements

In accordance with IFRS 1, Crombie presents an opening balance sheet in its first IFRS financial statements as at the date of transition to IFRS (January 1, 2010). In subsequent periods, when Crombie: (i) applies an accounting policy retrospectively, (ii) makes a retrospective restatement of items in its financial statements, or (iii) reclassifies items on the balance sheet; it will present an additional balance sheet as at the beginning of the earliest comparative period.

(d) Basis of consolidation
Crombie's financial statements consolidate those of Crombie and all of its subsidiary entities as at March 31, 2011. Subsidiaries are all entities over which Crombie has the power to control the financial and operating policies so as to benefit from its activities. All subsidiaries have a reporting date of March 31, 2011.

All intercompany transactions, balances, income and expenses are eliminated in preparing the consolidated financial statements. Where unrealized losses on intercompany asset sales are reversed on consolidation, the underlying asset is also tested for impairment from an entity perspective.

Operating income (loss) and other comprehensive income (loss) of subsidiaries acquired or disposed of during the period are recognized from the effective date of acquisition, or up to the effective date of disposal, as applicable.

(e) Investment properties
Investment properties are properties which are held to earn rental income. Investment properties include land, buildings and intangible assets. Investment properties are carried at cost less accumulated depreciation and are reviewed periodically for impairment as described in Note 2(w).

Depreciation of buildings is calculated using the straight-line method with reference to each property's cost, the estimated useful life of the building (not exceeding 40 years) and its components, significant parts and residual value.

Repair and maintenance improvements are expensed as incurred or, in the case of major items that constitute a capital asset, are capitalized to the building and amortized on a straight-line basis over the expected useful life of the improvement.

Upon acquisition, Crombie performs an assessment of investment properties being acquired to determine whether the acquisition is to be accounted for as an asset acquisition or a business combination. A transaction is considered to be a business combination if the acquired property meets the

definition of a business; being an integrated set of activities and assets that are capable of being managed for the purpose of providing a return to the Unitholders.

For an acquisition that is accounted for as an asset acquisition, Crombie allocates the purchase price based on the following:

Land – The amount allocated to land is based on an appraisal estimate of its fair value.

Buildings – Buildings are recorded at the estimated fair value of the building and its components and significant parts.

Fair value of debt - Values ascribed to fair value of debt are determined based on the differential between contractual and market interest rates on long term liabilities assumed at acquisition.

For an acquisition that is accounted for as a business combination, Crombie allocates the purchase price based on the following:

Land - The amount allocated to land is based on an appraisal estimate of its fair value.

Buildings - Buildings are recorded at the fair value of the building on an "as-if-vacant" basis, which is based on the present value of the anticipated net cash flow of the building from vacant start up to full occupancy. In addition, components and significant parts of buildings are recorded at their estimated fair value.

Intangible Assets - Intangible assets are recorded for tenant relationships, based on estimated costs avoided should the respective tenants renew their leases at the end of the initial lease time, adjusted for the estimated probability of renewal.

Fair value of debt - Values ascribed to fair value of debt are determined based on the differential between contractual and market interest rates on long term liabilities assumed at acquisition.

(f) Intangible assets

Intangible assets include the value of tenant relationships.

Amortization of the value of tenant relationships is determined using the straight-line method over the terms of the tenant lease agreements and renewal periods where applicable and is recorded as amortization.

Intangible assets are reviewed for impairment as described in Note 2(w).

(g) Cash and cash equivalents

Cash and cash equivalents are defined as cash on hand and cash in bank and guaranteed investments with a maturity less than 90 days at date of acquisition.

(h) Discontinued operations

Crombie classifies properties that meet certain criteria as held for sale and separately discloses any operating income and gain (loss) on disposal for current and prior periods as discontinued operations. A property is classified as held for sale at the point in time when it is available for immediate sale, management has committed to a plan to sell the property and is actively locating a purchaser for the property at a sales price that is reasonable in relation to the current estimated fair value of the property, and the sale is expected to be completed within a one year period. Properties held for sale are carried at the lower of their carrying values and estimated fair value less costs to sell. In addition, assets held for sale are no longer depreciated and amortized. A property that is subsequently reclassified as held in use is measured at the lower of its carrying value amount before it was classified as held for sale, adjusted for any depreciation and amortization expense that would have been recognized had it been continuously classified as held and in use, and its estimated fair value at the date of the subsequent decision not to sell.

(i) Convertible debentures

Debentures with conversion features are assessed at inception as to the value of both the conversion feature and the debt component. Crombie applies the residual method in determining the values of the conversion feature of the debt component and the conversion feature. Interest payments to debenture holders are presented as finance costs. Issue costs on convertible debentures are netted against the convertible debentures and amortized over the original life of the convertible debentures using the effective interest method.

(j) Employee future benefits obligation

The cost of Crombie's pension benefits for defined contribution plans are expensed for employees in respect of the period in which they render the services. The cost of defined benefit pension plans and other benefit plans is accrued based on estimates, using actuarial techniques, of the amount of benefits employees have earned in return for their services in the current and prior periods. The present value of the defined benefit obligation

and current service cost is determined by discounting the estimated benefits using the projected unit credit method to determine the fair value of the plan assets and total actuarial gains and losses and the proportion thereof which will be recognized. Other factors considered for other benefit plans include assumptions regarding salary escalation, retirement ages and expected growth rate of health care costs. The fair value of the plan assets is based on current market values. The present value of defined benefit obligation is based on the discount rate determined by reference to the yield of high quality corporate bonds of similar currency, having terms of maturity which align closely with the period of maturity of the obligation. The defined benefit plan and post-retirement benefit plan are unfunded.

The impact of changes in plan provisions will be recognized in benefit costs on a straight-line basis over a period not exceeding the average period until the benefit becomes vested. To the extent that the benefits are already vested immediately following the introduction of, or changes to the plan, the past service cost will be recognized immediately.

In measuring its defined benefit liability, Crombie recognizes unamortized actuarial gains and losses directly to other comprehensive income (loss).

(k) Employee unit purchase plan

Crombie has a unit purchase plan for certain employees which is described in Note 17. Loans granted to employees to purchase units under the plan are accounted for as a reduction to net assets attributable to Unitholders.

(l) Revenue recognition

Property revenue includes rents earned from tenants under lease agreements, percentage rent, realty tax and operating cost recoveries, and other incidental income. Certain leases have rental payments that change over their term due to changes in rates. Crombie records the rental revenue from leases on a straight-line basis over the term of the lease. Accordingly, an accrued rent receivable is recorded for the difference between the straight-line rent recorded as property revenue and the rent that is contractually due from the tenants. In addition, tenant incentives are amortized on a straight-line basis over the term of existing leases and the amortization is shown as a reduction in property revenue. Percentage rents are recognized when tenants are obligated to pay such rent under the terms of the related lease agreements. Realty tax and other operating cost recoveries, and other incidental income, are recognized on an accrual basis.

(m) Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Operating leases

i. Crombie as lessor

Crombie has determined that all of its leases with its tenants are operating leases. Revenue is recorded in accordance with Crombie's revenue recognition policy (Note 2(l)).

ii. Crombie as lessee

Operating leases consist mainly of land leases which are expensed to property operating costs as incurred. Crombie also has a small amount of equipment and vehicle leases that are expensed to general and administrative costs as incurred.

(n) Deferred financing charges

Amortization of deferred financing charges is calculated using the effective interest method over the terms of the related debt.

(o) Finance costs - operations

Finance costs - operations primarily comprise interest on Crombie's borrowings. Finance costs directly attributable to the acquisition, redevelopment, construction or production of a qualifying asset are capitalized as a component of the cost of the asset to which it is related. All other finance costs - operations are expensed in the period in which they are incurred. As of March 31, 2011, Crombie has not capitalized any borrowing costs.

(p) Finance costs – distributions to Unitholders

The determination to declare and make payable distributions from Crombie is at the discretion of the Board of Trustees and, until declared payable by the Board of Trustees, Crombie has no contractual requirement to pay cash distributions to Unitholders. During the quarter ended March 31, 2011, $14,751 (quarter ended March 31, 2010 - $13,568) in cash distributions were declared payable by the Board of Trustees to Crombie Unitholders and Crombie Limited Partnership Unitholders (the "Class B LP Units").

(q) Income taxes

Crombie is taxed as a "mutual fund trust" for income tax purposes. It is the intention of Crombie, subject to approval of the trustees, to make distributions not less than the amount necessary to ensure that Crombie will not be liable to pay income tax, except for the amounts incurred in its incorporated subsidiaries.

Income tax expense or recovery recognized in operations comprises the sum of deferred income tax and current income tax not recognized in other comprehensive income (loss).

Deferred income tax assets and/or liabilities of Crombie relate to tax and accounting basis differences of all incorporated subsidiaries of Crombie. Income taxes are accounted for using the liability method. Under this method, deferred income taxes are recognized for the expected deferred tax consequences of differences between the carrying amount of balance sheet items and their corresponding tax values. Deferred income taxes are computed using substantively enacted corporate income tax rates for the years in which tax and accounting basis differences are expected to reverse.

Deferred tax assets and/or liabilities are offset only when Crombie has a right and intention to set off tax assets and liabilities from the same taxation authority. Changes in deferred tax assets or liabilities are recognized as a component of income or expense in operations, except where they relate to items that are recognized in other comprehensive income (loss) (such as the unrealized gains and losses on cash flow hedges) or directly in change in net assets, in which case the related deferred tax is also recognized in other comprehensive income (loss) or change in net assets, respectively.

(r) Hedges

Crombie has cash flow hedges which are used to manage exposures to increases in variable interest rates. Cash flow hedges are recognized on the balance sheet at fair value with the effective portion of the hedging relationship recognized in other comprehensive income (loss). Any ineffective portion of the cash flow hedge is recognized in operating income. Amounts recognized in accumulated other comprehensive income (loss) are reclassified to operating income in the same periods in which the hedged item is recognized in operating income. Fair value hedges and the related hedge items are recognized on the balance sheet at fair value with any changes in fair value recognized in operating income. To the extent the fair value hedge is effective, the changes in the fair value of the hedge and the hedged item will offset each other.

Crombie has a fixed interest rate swap agreement and a delayed interest rate swap agreement designated as cash flow hedges. Crombie has identified these hedges against increases in benchmark interest rates and has formally documented all relationships between these derivative financial instruments and hedged items, as well as the risk management strategy and objectives.

Crombie assesses on an ongoing basis whether the derivative financial instrument continues to be effective in offsetting changes in interest rates on the hedged items.

Crombie currently has no fair value hedges.

(s) Comprehensive income (loss)

Comprehensive income (loss) is the change in net assets attributable to Unitholders' during a period from transactions and other events and circumstances from non-unitholder sources. Crombie reports a consolidated statement of comprehensive income (loss), comprising changes in net assets attributable to Unitholders and other comprehensive income (loss) for the period. Accumulated other comprehensive income (loss), has been added to the consolidated statements of changes in net assets attributable to Unitholders.

(t) Provisions

Provisions are recognized when Crombie has a present obligation (legal or constructive) as a result of a past event, it is probable that Crombie will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows, where the time value of money is material. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. Provisions reflect Crombie's best estimate at the reporting date.

Environmental liabilities are recognized when Crombie has an obligation relating to site closure or rehabilitation. The extent of the work required and the associated costs are dependent on the requirements of the relevant authorities and Crombie's environmental policies. Provisions for the cost of each closure and rehabilitation program are recognized at the time that environmental disturbance occurs. Changes in the provision are recognized in the period of the change.

Employee future benefit obligation is Crombie's only material provision and is separately disclosed on the balance sheet. All other provisions are immaterial and are included in trade and other payables.

(u) Financial instruments

Crombie classifies financial assets and liabilities according to their characteristics and management's choices and intentions related thereto for the purpose of ongoing measurements. Classification choices for financial assets include: a) fair value through operating income ("FVTPL") - measured at fair value with changes in fair value recorded in operating income for the period; b) held to maturity - recorded at amortized cost with gains and losses recognized in operating income in the period that the asset is derecognized or impaired; c) available-for-sale - measured at fair value with changes in fair value recognized in other comprehensive income (loss) for the current period until realized through disposal or impairment; and d) loans and receivables - recorded at amortized cost with gains and losses recognized in operating income in the period that the asset is no longer recognized or impaired. Classification choices for financial liabilities include: a) FVTPL - measured at fair value with changes in fair value recorded in operating income for the period; and b) other - measured at amortized cost with gains and losses recognized in operating income in the period that the liability is no longer recognized. Subsequent measurement for these assets and liabilities are based on either fair value or amortized cost using the effective interest method, depending upon their classification. Any financial asset or liability can be classified as FVTPL as long as its fair value is reliably determinable.

Crombie's financial assets and liabilities are generally classified and measured as follows:

Asset/Liability	Classification	Measurement
Cash equivalents	Loans and receivables	Amortized cost
Trade receivables	Loans and receivables	Amortized cost
Tenant incentives	Loans and receivables	Amortized cost
Restricted cash	Loans and receivables	Amortized cost
Notes receivable	Loans and receivables	Amortized cost
Derivative financial assets and liabilities	Available-for-sale	Fair value
Bank indebtedness	Other liabilities	Amortized cost
Accounts payable and other liabilities	Other liabilities	Amortized cost
Investment property debt and liabilities related to discontinued operations	Other liabilities	Amortized cost
Convertible debentures	Other liabilities	Amortized cost

Other balance sheet accounts, including, but not limited to, prepaid expenses, investment properties, intangible assets, deferred income taxes and employee future benefits obligation are not financial instruments.

Transaction costs, other than those related to financial instruments classified as fair value through operating income that are expensed as incurred, are added to the fair value of the financial asset or financial liability on initial recognition and amortized using the effective interest method.

Embedded derivatives are required to be separated and measured at fair values if certain criteria are met. Crombie does not currently have any embedded derivatives in its contracts that require separate accounting treatment.

The fair value of a financial instrument is the amount of the consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. To estimate the fair value of each type of financial instrument various market value data and other valuation techniques were used as appropriate. The fair value of interest rate swaps were estimated by discounting net cash flows of the swaps using forward interest rates for swaps of the same remaining maturities.

(v) Net Assets Attributable to Unitholders

(i) Balance Sheet presentation

In accordance with IAS 32 Financial Instruments: Presentation, puttable instruments are generally classified as financial liabilities. Crombie's REIT units and Class B LP units with attached Special Voting Units ("SVU") are both puttable instruments, meeting the definition of financial liabilities in IAS 32. There are exception tests within IAS 32 which could result in classification as equity, however, Crombie's units do not meet the exception requirements. Therefore, Crombie has no instrument qualifying for equity classification on its Balance Sheet pursuant to IFRS. The classification of all units as financial liabilities with presentation as net assets attributable to Unitholders does not alter the underlying economic interest of the Unitholders in the net assets and net operating results attributable to Unitholders.

(ii) Balance Sheet measurement

REIT units and Class B LP units with attached SVUs are carried on the Balance Sheet at net asset value. Although puttable instruments classified as financial liabilities are generally required to be remeasured to fair value at each reporting period, the alternative presentation as net assets attributable to Unitholders reflects that, in total, the interests of the Unitholders is limited to the net assets of Crombie.

(iii) Statement of Comprehensive Income (Loss) presentation

As a result of the classification of all units as financial liabilities, the statement of comprehensive income (loss) recognizes distributions to Unitholders as a finance cost. In addition, terminology such as Net income has been replaced by Increase (decrease) in net assets attributable to Unitholders to reflect the absence of an equity component on the Balance Sheet.

(iv) Presentation of Per Unit Measures

As a result of the classification of all units as financial liabilities, Crombie has no equity instrument; therefore, in accordance with IAS 33 Earnings per Share, there is no denominator for purposes of calculation of per unit measures.

(v) Allocation of Comprehensive Income (Loss)

The components of Comprehensive income (loss) are allocated between REIT Units and Class B LP Units as follows:

- Operating income – based on the weighted average number of units outstanding during the reporting period
- Accumulated Other Comprehensive Income (Loss) – increases in accumulated comprehensive income (loss) are allocated based on the weighted average number of units outstanding during the reporting period, decreases in previously accumulated amounts are drawn down based on the average accumulation allocation rate
- Finance costs – distributions – based on the actual distributions paid to each separate unit class.

(w) Use of estimates and judgments

The preparation of consolidated financial statements, in conformity with IAS 34, requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Significant items include impairment, employee future benefits, depreciation, income taxes, investment properties, purchase price allocations and fair value of financial instruments. These estimates are based on historical experience and management's best knowledge of current events and actions that Crombie may undertake in the future. Actual results could differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revisions affect only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by management in the preparation of these financial statements that have significant effect and estimates with a significant risk of material adjustment to the carrying amount of assets and liabilities are as follows:

Impairment of long-lived tangible and definite life intangible assets

Long-lived tangible and definite life intangible assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any). The recoverable amount is the higher of fair value less costs to sell and value in use. Where the asset does not generate cash flows that are independent from other assets, Crombie estimates the recoverable amount of the cash generating unit(s) to which the asset belongs. When the recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash generating unit) is reduced to the recoverable amount. An impairment loss is recognized as an expense immediately in operating income.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate, but is limited to the carrying amount that would have been determined if no impairment loss had been recognized in prior years. A reversal of impairment loss is recognized immediately in operating income.

Defined benefit liability

Management estimates the defined benefit liability annually with the assistance of independent actuaries; however, the actual outcome may vary due to estimation uncertainties. The estimate of Crombie's defined benefit liability is based on standard rates of inflation, medical cost trends and mortality. It also takes into account Crombie's specific anticipation of future salary increases. Discount factors are determined each reporting period by reference to high quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. Estimation uncertainties exist particularly with regard to medical cost trends, which may vary significantly in future appraisals of Crombie's defined benefit obligations.

Investment property valuation

An external, independent valuation company, having appropriate recognized professional qualifications and recent experience in the location and category of property being valued, values Crombie's investment property portfolio on a rotating basis over a period of a maximum of four years. The fair values, based on the date of the valuation, represent an estimate of the price that would be agreed upon between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. Internal quarterly revaluations are performed using internally generated valuation models prepared by considering the aggregate cash flows received from leasing the property. A yield obtained from an independent valuation company, which reflects the specific risks inherent in the net cash flows, is then applied to the net annual cash flows to arrive at the property valuation.

Deferred income taxes

The assessment of the probability of future taxable income in which deferred tax assets can be utilized is based on Crombie's latest budget forecast, which is adjusted for significant non-taxable income and expenses and specific limits to the use of any unused tax loss or credit. If a positive forecast of taxable income indicates the probable use of a deferred tax asset, especially when it can be used without a time limit, that deferred tax asset is usually recognized in full. The recognition of deferred tax assets that are subject to certain legal or economic limits or uncertainties are assessed individually by management based on the specific facts and circumstances.

Crombie recognizes expected liabilities for tax based on estimation of the likely taxes due, which requires significant judgment as to the ultimate tax determination of certain items. Where the actual liability arising from these issues differs from these estimates, such differences will have an impact on the income tax and deferred tax balances in the period when such determination is made.

Purchase price allocation

Investment properties are properties which are held to earn rental income. Investment properties include land, buildings and intangible assets. Upon acquisition, management allocates the purchase price of the acquisition as described in Note 2(e). This allocation contains a number of estimates and underlying assumptions including, but not limited to, estimated cash flows, discount rates, lease-up rates, inflation rates, renewal rates and leasing costs.

Fair value of financial instruments

The fair value of marketable financial instruments is the estimated amount for which an instrument could be exchanged, or a liability settled, by Crombie and a knowledgeable, willing party in an arm's length transaction.

The fair value of other financial instruments is based upon discounted future cash flows using discount rates that reflect current market conditions for instruments with similar terms and risks. Such fair value estimates are not necessarily indicative of the amounts Crombie might pay or receive in actual market transactions.

(x) Changes in accounting policies

(i) IFRS 9 Financial instruments

IFRS 9 Financial Instruments is the first of a multi-phase project to replace IAS 39 Financial Instruments: Recognition and Measurement. It addresses the classification, measurement and derecognition of financial assets and financial liabilities.

IFRS 9 divides all financial assets that are currently in the scope of IAS 39 into two classifications – those measured at amortized cost and those measured at fair value. Classification is made at the time the financial asset is initially recognized when the entity becomes a party to the contractual provisions of the instrument. The transition guidance is complex and mainly requires retrospective application. Most of the requirements in IAS 39 for the classification and measurement of financial liabilities have been carried forward, unchanged to IFRS9. Where an entity chooses to measure its own debt at fair value, IFRS 9 now requires the amount of the change in fair value due to changes in the issuing entity's own credit risk to be presented in other comprehensive income (loss). An exception to the new approach is made where the effects of changes in the liability's credit risk would create or enlarge an accounting mismatch in operating income, in which case all gains or losses on that liability are to be presented in operating income.

This policy is effective for fiscal years after January 1, 2013; however, earlier adoption is permitted. Crombie is currently evaluating the impact of this policy.

(ii) IAS 12 Deferred Tax: Recovery of Underlying Assets

The International Accounting Standards Board ("IASB") has published some limited scope amendments to IAS 12 Income Taxes, which are relevant only when an entity elects to use the fair value model for measurement in IAS 40 Investment Property. Under IAS 12, the measurement of deferred tax liabilities and deferred tax assets depends on whether an entity expects to recover an asset by using it or by selling it. To provide a practical approach in such cases, the amendment introduces a presumption that an investment property is recovered entirely through sale.

SIC-21 Income Taxes – Recovery of Revalued Non-Depreciable Assets addresses similar issues involving non-depreciable assets measured using the revaluation model in IAS 16 Property, Plant and Equipment. This guidance has been incorporated into IAS 12 as part of the amendments.

This policy is effective for fiscal years after January 1, 2012; however, earlier adoption is permitted. Crombie does not currently use the fair value model for measurement in IAS 40, therefore there is no anticipated impact from the policy.

3) INVESTMENT PROPERTIES

	Land	Buildings	Deferred Leasing Costs	Total

Derecognition	-	-	(149)	(149)
Balance, March 31, 2010	**-**	**75,809**	**777**	**76,586**
Net carrying value, March 31, 2010	**$377,977**	**$1,004,260**	**$1,989**	**$1,384,226**

The estimated fair values of Crombie's investment properties are as follows:

	Fair Value	Carrying Value
March 31, 2011	$1,781,000	$1,558,152
December 31, 2010	$1,739,000	$1,561,992
March 31, 2010	$1,505,000	$1,453,879
January 1, 2010	$1,457,000	$1,397,356

Carrying value includes investment properties, intangible assets, and accrued straight-line rent and tenant incentives which are included in other assets. Fair value represents the amount at which the properties could be exchanged between a knowledgeable and willing buyer and a knowledgeable and willing seller in an arm's length transaction at the date of valuation.

Investment properties have been fair valued using the following methods and key assumptions:

(i) The capitalized net operating income method - Under this method, capitalization rates are applied to net operating income (property revenue less property operating expenses). The key assumption is the capitalization rates for each specific property. Crombie receives quarterly capitalization rate reports from external knowledgeable property valuators. The capitalization rate reports provide a range of rates for various geographic regions and for various types and qualities of properties within each region. Management selects the appropriate rate for each property from the range provided. Crombie generally employs this method to determine fair value.

(ii) The discounted cash flow method - Under this method, discount rates are applied to the forecasted cash flows reflecting the initial terms of the lease or leases for that specific property and assumptions as to renewal and new leasing activity. The key assumption is the discount rate applied over the initial term of the lease. Crombie employs this method when the capitalized net operating income method indicates a risk of impairment, or when a property is or will be undergoing redevelopment.

(iii) External appraisals - External independent appraisals were completed on all properties acquired during 2010. No other investment properties have been externally appraised since January 1, 2010.

Crombie utilizes capitalization and discount rates within the ranges provided by external valuations. To the extent that the externally provided capitalization rate ranges change from one reporting period to the next; or should another rate within the provided ranges be more appropriate than the rate previously used, the fair value of the investment properties would increase or decrease accordingly.

Crombie has utilized the following weighted average capitalization rates and has determined that an increase (decrease) in the applied capitalization rate or discount rate of 0.25% would result in an increase (decrease) in the fair value of the investment properties as follows:

		Impact of a 0.25% change in Capitalization Rate	
	Weighted Average Rate	Increase in rate	Decrease in rate
March 31, 2011	7.51%	$(58,000)	$62,000
December 31, 2010	7.70%	$(55,000)	$59,000
March 31, 2010	8.21%	$(45,000)	$47,000
January 1, 2010	8.24%	$(42,000)	$45,000

Investment Property Acquisitions

The operating results of acquired properties are included from the respective date of acquisition.

2010

Acquisition Date	Properties Acquired	Approximate Square Footage	Initial Purchase Price	Assumed Mortgages	Mortgages
February 22, 2010	5 Retail	186,000	$31,530	$8,358	$-
March 24, 2010	3 Retail	147,000	27,746	-	19,000
September 28, 2010	9 Retail	400,000	84,297	-	59,770
October 28, 2010	1 Retail	47,000	11,250	-	7,700
November 22, 2010	2 Retail	87,000	17,000	-	11,900
		867,000	**$171,823**	**$8,358**	**$98,370**

All of the above properties, excluding the properties acquired on November 22, 2010, were acquired from subsidiaries of Empire Company Limited, a related party. The two retail properties acquired on November 22, 2010 were acquired from a joint venture of which a subsidiary of Empire Company Limited was a partner. The initial purchase price stated above excludes closing and transaction costs. The balance of the February and March 2010 acquisitions, after deducting assumed and new mortgage proceeds, was funded through Crombie's floating rate revolving credit facility. The September 28, 2010 acquisition was financed with new mortgage proceeds and the balance was funded with proceeds from the August 4, 2010 $50,000 REIT and Class B LP units offering. The balance of the October and November 2010 acquisitions, after deducting new mortgage proceeds, was funded with proceeds from the August 4, 2010 $50,000 REIT and Class B LP units offering.

The allocation of the total cost of the acquisitions is as follows:

Investment property acquired, net:	Three Months Ended Mar. 31, 2011	Year Ended Dec. 31, 2010	Three Months Ended Mar. 31, 2010
Land	$-	$50,319	$9,920

Balance, March 31, 2010	**$40,324**	**$(9,590)**	**$30,734**

6) NOTES RECEIVABLE

On March 23, 2006, Crombie acquired 44 properties from Empire Company Limited's subsidiary, ECL Properties Limited ("ECL") and certain affiliates, resulting in ECL Developments Limited issuing two demand non-interest bearing promissory notes in the amounts of $39,600 and $20,564. Payments on the first note of $39,600 are being received as funding is required for a capital expenditure program relating to eight commercial properties. Payments on the second note of $20,564 are being received on a monthly basis to reduce the effective interest rate to 5.54% on certain assumed mortgages with terms to maturity to April 2022.

The balance of each note is as follows:

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Capital expenditure program	$105	$105	$436	$436
Interest rate subsidy	3,960	4,238	5,082	5,485
	$4,065	**$4,343**	**$5,518**	**$5,921**

7) ASSETS AND LIABILITIES RELATED TO DISCONTINUED OPERATIONS

During the fourth quarter of 2008, Crombie defeased the mortgage associated with discontinued operations. The transaction did not qualify for defeasance accounting, therefore the defeased loan and related asset have not been removed from the balance sheet. The defeased loan is payable in monthly payments of $42 and bears interest at 5.46%, was originally amortized over 25 years and is due April 1, 2014. Crombie purchased Government of Canada bonds and treasury bills and Canada mortgage bonds and pledged them as security to the mortgage company. The bonds have maturity dates to September 15, 2013, have a weighted average interest rate of 3.62% and have been placed in escrow. The assets and liabilities related to discontinued operations are measured at amortized cost using the effective interest method, until April 1, 2014 at which time they will be extinguished.

8) INVESTMENT PROPERTY DEBT

	Range	Weighted average interest rate	Weighted average term to maturity	Mar. 31, 2011
Fixed rate mortgages	4.53-7.30%	5.77%	7.2 years	$749,657
Floating rate revolving credit facility		2.33%	0.3 years	50,000
Deferred financing charges				(6,308)
				$793,349

	Range	Weighted average interest rate	Weighted average term to maturity	Dec. 31, 2010
Fixed rate mortgages	4.53-7.30%	5.77%	7.4 years	$755,665
Floating rate revolving credit facility		2.32%	0.5 years	50,000
Deferred financing charges				(6,538)
				$799,127

	Range	Weighted average interest rate	Weighted average term to maturity	Mar. 31, 2010
Fixed rate mortgages	4.82-7.30%	5.86%	7.5 years	$673,481
Floating rate revolving credit facility		1.57%	1.3 years	54,500
Deferred financing charges				(5,964)
				$722,017

	Range	Weighted average interest rate	Weighted average term to maturity	Jan. 1, 2010
Fixed rate mortgages	4.82-8.00%	5.66%	5.8 years	$604,992
Floating rate revolving credit facility		1.53%	1.5 years	106,160
Deferred financing charges				(4,783)
				$706,369

As at March 31, 2011, debt retirements for the next 5 years are:

12 Months ending	Fixed Rate Principal Payments	Fixed Rate Maturities	Floating Rate Maturities	Total
March 31, 2012	$22,672	$26,786	$50,000	$99,458
March 31, 2013	23,940	-	-	23,940
March 31, 2014	24,705	78,073	-	102,778
March 31, 2015	22,211	29,300	-	51,511
March 31, 2016	21,739	51,119	-	72,858
Thereafter	87,037	356,157	-	443,194
	$202,304	$541,435	$50,000	793,739
Deferred financing charges				(6,308)
Unamortized fair value debt adjustment				5,918
				$793,349

Specific investment properties with a carrying value of $1,452,874 as at March 31, 2011 (December 31, 2010 – $1,456,507; March 31, 2010 - $1,346,129) are currently pledged as security for mortgages or provided as security for the floating rate revolving credit facility. Carrying value includes Investment properties, Intangible assets, and Accrued straight-line rent and Tenant incentives which are included in Other assets.

The floating rate revolving credit facility has a maximum principal amount of $150,000 and is used by Crombie for working capital purposes and to provide financing for future acquisitions. It is secured by a pool of first and second mortgages on certain properties. The floating interest rate is based on specific margins over prime rate or bankers acceptance rates. The specified margin increases as Crombie's overall debt leverage increases. The floating rate revolving credit facility matures June 30, 2011.

Should ECL Developments Limited reduce its voting interest below 40%, Crombie will be required to renegotiate the revolving credit facility or obtain alternative financing. Pursuant to an exchange agreement, and while such voting interest threshold remains in place, ECL Developments Limited will be required to give Crombie at least six months' prior written notice of its intention to reduce its voting interest below 40%.

See Note 20(a) for fair value information.

9) CONVERTIBLE DEBENTURES

	Conversion Price	Maturity Date	Interest Rate	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Series A (CRR.DB)	$13.00	Mar. 20, 2013	7.00%	$29,985	$29,985	$30,000	$30,000
Series B (CRR.DB.B)	$11.00	Jun. 30, 2015	6.25%	75,749	78,263	85,000	85,000
Series C (CRR.DB.C)	$15.30	Jun. 30, 2017	5.75%	45,000	45,000	45,000	-
Deferred financing charges				(4,462)	(4,815)	(6,161)	(4,142)
				$146,272	**$148,433**	**$153,839**	**$110,858**

Debenture Conversions	**Conversion Price**	**Three Months Ended Mar. 31, 2011**	**Year Ended Dec. 31, 2010**	**Three Months Ended Mar. 31, 2010**	**To Jan. 1, 2010**
Series A (CRR.DB)	$13.00	$-	$15	$-	$-
Series B (CRR.DB.B)	$11.00	2,514	6,737	-	-
		$2,514	**$6,752**	**$-**	**$-**
REIT Units Issued		228,540	613,601	-	-

As at March 31, 2011, debenture retirements for the next 5 years are:

12 Months ending	Series A	Series B	Series C	Total
March 31, 2012	$-	$-	$-	$-
March 31, 2013	29,985	-	-	29,985
March 31, 2014	-	-	-	-
March 31, 2015	-	-	-	-
March 31, 2016	-	75,749	-	75,749
Thereafter	-	-	45,000	45,000
	$29,985	$75,749	$45,000	150,734
Deferred financing charges				(4,462)
				$146,272

The Series A, Series B, and Series C Convertible Debentures, (collectively the "Debentures") pay interest semi-annually on June 30 and December 31 of each year and Crombie has the option to pay interest on any interest payment date by selling REIT units and applying the proceeds to satisfy its interest obligation.

The Debentures are convertible into REIT Units at the option of the debenture holder at any time up to the maturity date, at the conversion price indicated in the table above, being a conversion rate of approximately 76.9231 REIT Units per one thousand principal amount of Series A

Convertible Debentures, 90.9091 REIT Units per one thousand principal amount of Series B Convertible Debentures and 65.3595 REIT Units per one thousand principal amount of Series C Convertible Debentures. If all conversion rights attaching to the Series A Convertible Debentures, the

Series B Convertible Debentures and the Series C Convertible Debentures were exercised, as at March 31, 2011, Crombie would be required to issue approximately 2,306,538 REIT Units, 6,886,273 REIT Units, and 2,941,176 REIT Units, respectively, subject to anti-dilution adjustments.

For the first three years from the date of issue, there is no ability to redeem the Debentures, after which, each series of Debentures has a period, lasting one year, during which the Debentures may be redeemed, in whole or in part, on not more than 60 days' and not less than 30 days' prior notice, at a redemption price equal to the principal amount thereof plus accrued and unpaid interest, provided that the volume-weighted average trading price of the REIT Units on the TSX for the 20 consecutive trading days ending on the fifth trading day preceding the date on which notice on redemption is given exceeds 125% of the conversion price. After the end of the fourth year, and to the maturity date, the Debentures may be redeemed, in whole or in part, at anytime at the redemption price equal to the principal amount thereof plus accrued and unpaid interest. Provided that there is not a current event of default, Crombie will have the option to satisfy its obligation to pay the principal amount of the Debentures at maturity or upon redemption, in whole or in part, by issuing the number of REIT units equal to the principal amount of the Debentures then outstanding divided by 95% of the volume-weighted average trading price of the REIT units for a stipulated period prior to the date of redemption or maturity, as applicable. Upon change of control of Crombie, Debenture holders have the right to put the Debentures to Crombie at a price equal to 101% of the principal amount plus accrued and unpaid interest.

Based on management's assessment, Crombie has determined to date that no amount should be attributed to the conversion feature. Transaction costs related to the Debentures have been deferred and are being amortized into finance costs over the term of the Debentures using the effective interest method.

See 20(a) for fair value information.

10) INCOME TAXES

On September 22, 2007, tax legislation Bill C-52, the Budget Implementation Act, 2007 (the "Act") was passed into law. The Act related to the federal income taxation of publicly traded income trusts and partnerships. The Act subjects all existing income trusts, or specified investment flow-through entities ("SIFTs"), to corporate tax beginning in 2011, subject to an exemption for real estate investment trusts ("REITs"). A trust that satisfies the criteria of a REIT throughout its taxation year will not be subject to income tax in respect of distributions to its unitholders or be subject to the restrictions on its growth that would apply to SIFTs.

Crombie's management and their advisors have completed an extensive review of Crombie's organizational structure and operations to support Crombie's assertion that it meets the REIT technical tests contained in the Act. The relevant tests apply throughout the taxation year of Crombie and, as such, the actual status of Crombie for any particular taxation year can only be ascertained at the end of the year.

The deferred income tax liability of the wholly-owned corporate subsidiary which is subject to income taxes consists of the following:

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Tax liabilities relating to difference in tax and book value	$92,830	$92,592	$91,670	$91,389
Tax asset relating to non-capital loss carry-forward	(10,230)	(9,892)	(7,970)	(7,689)
Deferred income tax liability	**$82,600**	**$82,700**	**$83,700**	**$83,700**

The income tax expense (recovery) consists of the following:

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Provision for income taxes at the expected rate	$2,914	$2,143
Tax effect of income attribution to Crombie's unitholders	(3,014)	(243)
Decreased income tax resulting from a change in expected the expected rate	-	(1,900)
Income taxes – deferred	**$(100)**	**$-**

Components of other comprehensive income are not tax valued as there are no tax implications to Crombie.

11) EMPLOYEE FUTURE BENEFITS

Crombie has a number of defined benefit and defined contribution plans providing pension and other retirement benefits to most of its employees.

Defined contribution pension plans

The contributions required by the employee and the employer are specified. The employee's pension depends on what level of retirement income (for example, annuity purchase) that can be achieved with the combined total of employee and employer contributions and investment income over the period of plan membership, and the annuity purchase rates at the time of the employee's retirement.

Defined benefit pension plans

The ultimate retirement benefit is defined by a formula that provides a unit of benefit for each year of service. Employee contributions, if required, pay for part of the cost of the benefit, and the employer contributions fund the balance. The employer contributions are not specified or defined within the plan text; they are based on the result of actuarial valuations which determine the level of funding required to meet the total obligation as estimated at the time of the valuation. Crombie's defined benefit plans are unfunded.

Crombie uses December 31 as a measurement date for accounting purposes for its defined benefit pension plans.

For the three months ending March 31, 2011, the net defined contribution pension plans expense was $218 (three months ended March 31, 2010 - $141).

12) TRADE AND OTHER PAYABLES

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Tenant improvements and capital expenditures	$16,484	$19,063	$18,661	$20,209
Property operating costs	14,896	12,967	13,460	10,575
Advance rents	2,484	1,862	2,363	2,069
Finance costs on investment property debt and debentures	5,794	3,460	5,348	2,836
Distributions payable	4,922	4,903	4,523	4,522
Fair value of interest rate swap agreements	1,922	2,488	3,219	3,534
	$46,502	**$44,743**	**$47,574**	**$43,745**

13) PROPERTY REVENUE

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Rental revenue contractually due from tenants	$56,065	$50,707
Contingent rental revenue	771	719
Straight-line rent recognition	828	958
Tenant incentive amortization	(1,346)	(1,026)
	$56,318	**$51,358**

The following tables set out tenants that contribute in excess of 10% of total property revenue:

	Three Months Ended Mar. 31, 2011		Three Months Ended Mar. 31, 2010	
	Percentage	**Revenue**	**Percentage**	**Revenue**
Sobeys	30.6%	$17,226	26.5%	$13,598

14) OPERATING LEASES

Crombie as a Lessor

Crombie's operations include leasing commercial real estate. Future minimum rental income under non-cancellable tenant leases are as follows:

	Remaining	Year Ending December 31,					
	2011	**2012**	**2013**	**2014**	**2015**	**Thereafter**	**Total**
Future minimum rental income	$104,846	$128,976	$119,407	$109,753	$100,961	$849,538	$1,413,481

Crombie as a Lessee

Operating lease payments represent rentals payable by Crombie for all of its land leases. These land leases have varying terms ranging from 14 to 74 years including renewal options:

	Remaining	Year Ending December 31,					
	2011	**2012**	**2013**	**2014**	**2015**	**Thereafter**	**Total**
Future minimum lease payments	**$**880	**$**1,191	**$**1,209	**$**1,210	**$**1,211	**$**47,207	**$**52,908

15) EMPLOYEE BENEFIT EXPENSE

Crombie's payroll expenses are included in general and administrative expenses and property expenses.

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Wages and salaries	$5,192	$4,978
Post employment benefits	140	135
	$5,332	**$5,113**

16) FINANCE COSTS – OPERATIONS

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Fixed rate mortgages	$12,369	$10,011
Floating rate term, revolving and demand facilities	701	1,323
Convertible debentures	2,341	2,196
Finance costs - operations	**15,411**	**13,530**
Amortization of fair value debt adjustment and accretion income	435	612
Change in accrued finance costs	(2,334)	(2,512)
Amortization of effective swap agreements	(1,054)	(827)
Amortization of deferred financing charges	(685)	(557)
Finance costs - operations, paid	**$11,773**	**$10,246**

Crombie REIT Units

Crombie is authorized to issue an unlimited number of REIT units and an unlimited number of SVU. Issued and outstanding REIT units may be subdivided or consolidated from time to time by the Trustees without the approval of the Unitholders. REIT units are redeemable at any time on demand by the holders at a price per REIT unit equal to the lesser of: (i) 90% of the weighted average price per Crombie REIT unit during the period of the last ten days during which Crombie's REIT units traded; and (ii) an amount equal to the price of Crombie's REIT units on the date of redemption, as defined in the Declaration of Trust.

The aggregate redemption price payable by Crombie in respect of any REIT Units surrendered for redemption during any calendar month will be satisfied by way of a cash payment in Canadian dollars within 30 days after the end of the calendar month in which the REIT Units were tendered for redemption, provided that the entitlement of Unitholders to receive cash upon the redemption of their REIT Units is subject to the limitation that:

i. the total amount payable by Crombie in respect of such REIT Units and all other REIT Units tendered for redemption, in the same calendar month must not exceed $50 (provided that such limitation may be waived at the discretion of the Trustees);

ii. at the time such REIT Units are tendered for redemption, the outstanding REIT Units must be listed for trading on the TSX or traded or quoted on any other stock exchange or market which the Trustees consider, in their sole discretion, provides representative fair market value prices for the REIT Units;

iii. the normal trading of REIT Units is not suspended or halted on any stock exchange on which the REIT Units are listed (or if not listed on a stock exchange, in any market where the REIT Units are quoted for trading) on the Redemption Date or for more than five trading days during the ten-day trading period commencing immediately after the Redemption Date.

On March 31, 2011, Crombie announced a normal course issuer bid ("NCIB") where Crombie may purchase for cancellation up to 100,000 of its REIT units, which represents approximately 0.28% of the outstanding REIT units, during the period April 4, 2011 to April 3, 2012. The purchases have to be made through the facilities of the TSX. The price that Crombie will pay for any such REIT units will be the market price at the time of acquisition. Under the TSX policies, Crombie is entitled to purchase a maximum of 14,387 REIT units per trading day. Crombie had a previous NCIB which expired March 25, 2011. Under that NCIB, Crombie acquired a total of 50,547 REIT units. During the first three months of 2011, Crombie did not acquire any REIT units under a NCIB.

During the first three months of 2011, $2,514 in Series B Convertible Debentures were converted to a total of 228,540 REIT Units at the conversion price of $11.00 per Unit.

On August 4, 2010, Crombie closed a public offering, on a bought deal basis, of 2,670,000 REIT Units to the public at a price of $11.05 per REIT Unit for proceeds of $28,155 net of issue costs. **Crombie REIT SVU and Class B LP Units**
The Declaration of Trust and the Exchange Agreement provide for the issuance of SVUs to the holders of Class B LP Units used solely for providing voting rights proportionate to the votes of Crombie's REIT Units. The SVUs are not transferable separately from the Class B LP Units to which they are attached and will be automatically transferred upon the transfer of such Class B LP Unit. If the Class B LP Units are exchanged in accordance with the Exchange Agreement, a like number of SVUs will be redeemed and cancelled for no consideration by Crombie.

The Class B LP Units issued by a subsidiary of Crombie to ECL Developments Limited are indirectly exchangeable on a one-for-one basis for Crombie's REIT Units at the option of the holder, under the terms of the Exchange Agreement.

Each Class B LP Unit entitles the holder to receive distributions from Crombie, pro rata with distributions made by Crombie on REIT Units.

On August 4, 2010, concurrently with the issuance of the REIT Units, in satisfaction of its pre-emptive right, ECL Developments Limited purchased 1,855,000 Class B LP Units and the attached SVUs at a price of $11.05 per Class B LP Unit for proceeds of $20,381 net of issue costs, on a private placement basis.

Employee Unit Purchase Plan ("EUPP")

Crombie provides for REIT unit purchase entitlements under the EUPP for certain senior executives. Awards made under the EUPP will allow executives to purchase REIT units from treasury at the average daily high and low board lot trading prices per REIT unit on the TSX for the five trading days preceding the issuance. Executives are provided non-recourse loans at 3% annual interest by Crombie for the purpose of acquiring REIT Units from treasury and the REIT Units purchased are held as collateral for the loan. The loan is repaid through the application of the after-tax amounts of all distributions received on the REIT Units, as well as the after-tax portion of any Long-Term Incentive Plan ("LTIP") cash awards received, as payments on interest and principal. As at March 31, 2011, there are loans receivable from executives of $1,696 under Crombie's EUPP, representing 181,140 REIT Units, which are classified as a reduction to net assets attributable to Unitholders. Loan repayments will result in a corresponding increase to net assets attributable to Unitholders. Market value of the REIT Units at March 31, 2011 was $2,335.

The compensation expense related to the EUPP for the three months ended March 31, 2011 was $15 (three months ended March 31, 2010 - $12).

18) SUPPLEMENTRY CASH FLOW INFORMATION

a) Items not affecting operating cash

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Items not affecting operating cash:		
Depreciation of investment properties	$6,301	$6,090
Amortization of tenant incentives	1,346	1,026
Amortization of deferred leasing costs	122	89

Amortization of swap settlements	1,054	827
Amortization of intangible assets	1,334	1,943
Accrued straight-line rent	(828)	(958)
Unit based compensation	15	12
Income taxes – deferred	(100)	-
	$9,929	**$9,586**

b) Change in other non-cash operating items

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Cash provided by (used in):		
Trade receivables	$723	$937
Prepaid expenses and other assets	(1,225)	614
Payables and other liabilities	4,991	5,780
	$4,489	**$7,331**

19) RELATED PARTY TRANSACTIONS

Related party transactions are transactions with associates, post employment benefit plans, and key management personnel. Transactions between Crombie and its subsidiaries have been eliminated on consolidation and as such, are not disclosed in this note. Crombie uses the exchange amount as the measurement basis for related party transactions.

As at March 31, 2011, Empire Company Limited, through its wholly-owned subsidiary ECL Developments Limited, holds a 46.4% (fully diluted 40.4%) indirect interest in Crombie. Certain executive management individuals and other employees of Crombie provide general management, financial, leasing, administrative, and other administration support services to certain real estate subsidiaries of Empire Company Limited on a cost sharing basis pursuant to a Management Cost Sharing Agreement, dated March 23, 2006, between Crombie Developments

Limited, a subsidiary of Crombie, and ECL Developments Limited, a subsidiary of Empire Company Limited ("Management Cost Sharing Agreement"). The costs assumed by Empire Company Limited pursuant to the agreement during the three months ended March 31, 2011 were $265 (three months ended March 31, 2010 - $277).

Certain on-site maintenance and management employees of Crombie will provide property management services to certain real estate subsidiaries of Empire Company Limited on a cost sharing basis pursuant to the Management Cost Sharing Agreement. The costs assumed by Empire Company Limited pursuant to the Management Cost Sharing Agreement during the three months ended March 31, 2011 were $234 (three months ended March 31, 2010 - $283) and were netted against property expenses. In addition, for various periods, ECL Developments Limited has an obligation to provide rental income and interest rate subsidies pursuant to an Omnibus Subsidy Agreement dated March 23, 2006 between Crombie Developments Limited, Crombie Limited Partnership and ECL Developments Limited. The head lease subsidy during the three months ended March 31, 2011 was $143 (three months ended March 31, 2010 - $186) and the interest rate subsidy during the three months ended March 31, 2011 was $358 (three months ended March 31, 2010 - $507).

As of March 31, 2011, Crombie had $5,744 fixed rate second mortgage financings outstanding with Empire Company Limited. The mortgages have a weighted average interest rate of 5.38% and a maturity date of March 2014. Finance costs paid during the three months ended March 31, 2011 were $77 (three months ended March 31, 2010 - $80).

Crombie also earned rental revenue of $17,538 for the three months ended March 31, 2011 (three months ended March 31, 2010 - $15,009) from Sobeys Inc., Empire Theatres and other subsidiaries of Empire Company Limited.

Crombie paid $47 in head office rents to ECL Developments Limited for the three months ended March 31, 2011 (three months ended March 31, 2010 – $47).

During fiscal 2010, Crombie acquired 18 retail properties for a purchase price of $154,823, excluding closing and transaction costs. The properties, contain approximately 780,000 square feet, were acquired from a subsidiaries of Empire Company Limited.

In addition to the above acquisitions, on November 22, 2010, Crombie acquired two retail properties for a purchase price of $17,000, excluding closing and transaction costs. The properties, containing approximately 87,000 square feet, were acquired from a joint venture of which a subsidiary of Empire Company Limited was a 50% partner.

On February 22, 2010 Crombie repaid $3,471 to ECL General Partner Limited to retire a loan as required under the terms of the agreement.

On August 4, 2010, concurrently with a public offering of units, in satisfaction of its pre-emptive right, ECL Developments Limited purchased 1,855,000 Class B LP Units and the attached SVUs at a price of $11.05 per Class B LP Unit for proceeds of $20,381 net of issue costs, on a private placement basis

Key management personnel compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of Crombie. The following are considered to be Crombie's key management personnel: the Chief Executive Officer, Chief Financial Officer and the three other highest compensated executives.

The remuneration of members of key management during the period was approximately as follows:

	Three Months Ended Mar. 31, 2011	Three Months Ended Mar. 31, 2010
Salary, bonus and other short-term employee benefits	$531,322	$379,803
Other long-term benefits	86,181	64,260
	$617,503	**$444,063**

20) FINANCIAL INSTRUMENTS

a) Fair value of financial instruments

The fair value of a financial instrument is the estimated amount that Crombie would receive or pay to settle the financial assets and financial liabilities as at the reporting date.

Crombie has classified its financial instruments in the following categories:

i. Held to maturity investments – assets related to discontinued operations

ii. Loans and receivables - restricted cash, cash and cash equivalents, notes receivable and trade receivables

iii. Other financial liabilities - investment property debt, liabilities related to discontinued operations, convertible debentures, tenant improvements and capital expenditures payable, property operating costs payable and finance costs payable

iv. Available for sale – derivative instruments.

Due to their short-term nature, the carrying value of cash and cash equivalents, restricted cash, trade receivables and trade and other payables approximate fair values at the balance sheet date.

The fair value of other financial instruments is based upon discounted future cash flows using discount rates that reflect current market conditions for instruments with similar terms and risks. Such fair value estimates are not necessarily indicative of the amounts Crombie might pay or receive in actual market transactions.

The following table summarizes the carrying value (excluding deferred financing charges) and fair value of those financial instruments which have a fair value different from their carrying value at the balance sheet date.

	Mar. 31, 2011		Dec. 31, 2010		Mar. 31, 2010		Jan. 1, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets related to discontinued operations	$6,650	$6,760	$6,670	$6,815	$6,912	$7,015	$6,929	$7,066
Investment property debt	$799,657	$827,577	$805,665	$845,052	$727,981	$725,476	$711,152	$708,401
Convertible debentures	$150,734	$166,317	$153,248	$166,553	$160,000	$170,115	$115,000	$120,200
Liabilities related to discontinued operations	$6,129	$6,339	$6,171	$6,437	$6,294	$6,222	$6,334	$6,270

Crombie uses various methods in estimating the fair value of a financial instrument. The methods used comprise the following inputs:

Level 1 - quoted prices in active markets

Level 2 - inputs other than quoted prices in actives markets that are observable for the asset or liability either directly or indirectly

Level 3 - inputs are not based on observable market data (unobservable inputs)

The following categorizes and summarizes the significant methods and assumptions used in estimating the fair values of the financial instruments reflected in the above table:

Level 1:

Convertible debentures: The fair value of the convertible debentures is estimated based on the market trading prices, at the reporting date, of the convertible debentures.

Assets related to discontinued operations: The fair value of the bonds and treasury bills are based on market trading prices at the reporting date.

Level 3:

Investment property debt and liabilities related to discontinued operations: The fair value of Crombie's investment property debt and liabilities related to discontinued operations is estimated based on the present value of future payments, discounted at the yield on a Government of Canada bond with the nearest maturity date to the underlying debt, plus an estimated credit spread at the reporting date.

b) Risk management

In the normal course of business, Crombie is exposed to a number of financial risks that can affect its operating performance. These risks, and the action taken to manage them, are as follows:

Credit risk

Credit risk arises from the possibility that tenants may experience financial difficulty and be unable to fulfill their lease commitments. Crombie's credit risk is limited to the recorded amount of tenant receivables. A provision for doubtful accounts is taken for all anticipated collectability risks (Note 5).

Crombie mitigates credit risk by geographical diversification, utilizing staggered lease maturities, diversifying both its tenant mix and asset mix and conducting credit assessments for new and renewing tenants. As at March 31, 2011;

- Excluding Sobeys (which accounts for 36.3% of Crombie's minimum rent), no other tenant accounts for more than 2.0% of Crombie's minimum rent, and
- Over the next five years, no more than 9.8% of the gross leaseable area of Crombie will expire in any one year.

As outlined in Note 19, Crombie earned rental revenue of $17,538 for the three months ended March 31, 2011 (three months ended March 31, 2010 - $15,009) from Sobeys Inc., Empire Theatres and other subsidiaries of Empire Company Limited.

Receivables are substantially comprised of current balances due from tenants. The balance of accounts receivable past due is not significant. Generally, rents are due the first of each month and other tenant billings are due 30 days after invoiced, and in general balances over 30 days are considered past due. None of the receivable balances are considered impaired.

Provision for doubtful accounts is reviewed at each balance sheet date. A provision is taken on accounts receivable from independent accounts and is recorded as a reduction to its respective receivable account on the balance sheet. Crombie updates its estimate of provision for doubtful accounts based on past due balances on accounts receivable. Current and long-term accounts receivable are reviewed on a regular basis and are provided for when collection is considered uncertain.

There have been no significant changes to Crombie's credit risk.

	Three Months Ended Mar. 31, 2011	Year Ended Dec. 31, 2010	Three Months Ended Mar. 31, 2010
Provision for doubtful accounts, beginning of period	$699	$326	$326
Additional provision	149	624	103
Recoveries	(11)	(86)	(15)
Write-offs	(218)	(165)	(1)
Provision for doubtful accounts, end of period	**$619**	**$699**	**$413**

Interest rate risk

Interest rate risk is the potential for financial loss arising from increases in interest rates. Crombie mitigates interest rate risk by utilizing staggered debt maturities, limiting the use of permanent floating rate debt and utilizing interest rate swap agreements. As at March 31, 2011:

- Crombie's weighted average term to maturity of the fixed rate mortgages was 7.2 years, and
- Crombie has a floating rate revolving credit facility available to a maximum of $150,000, with a balance of $50,000 at March 31, 2011. Crombie's exposure to floating rate debt is reduced by a fixed interest rate swap agreement discussed below.

Crombie has entered into interest rate swap agreements to manage the interest rate profile of its current or future debts without an exchange of the underlying principal amount. The breakdown of the swaps in place at March 31, 2011 as part of the interest rate management program, and their associated mark-to-market amounts are as follows:

- Crombie has entered into a fixed interest rate swap to fix the amount of interest to be paid on $50,000 of the revolving credit facility. The fair value of the fixed interest rate swap at March 31, 2011, had an unfavourable mark-to-market exposure of $772 (December 31, 2010 – unfavourable $1,153, March 31, 2010 – unfavourable $2,398) compared to its face value. The unfavourable mark-to-market exposure has been included in payables and the favourable change in the mark-to-market adjustment for the three months ended March 31, 2011 of $381 (three months ended March 31, 2010 - $497) has been recognized in other comprehensive income (loss). The mark-to-market amount of fixed interest rate swaps reduce to $Nil upon maturity of the swaps.
- Crombie has entered into a delayed interest rate swap agreement of a notional amount of $8,204 with a settlement date of July 2, 2011 and maturing July 2, 2021 to mitigate exposure to interest rate increases for a mortgage maturing in 2011. The fair value of the delayed interest rate swap agreement at March 31, 2011 had an unfavourable mark-to-market exposure of $1,150 (December 31, 2010 – unfavourable $1,335, March 31, 2010 – unfavourable $821) compared to its face value. The unfavourable mark-to-market exposure has been included in payables and the favourable change in the mark-to-market adjustment for the three months ended March 31, 2011 of $185 (three months ended March 31, 2010 – unfavourable change $182) has been recognized in other comprehensive income (loss).

Crombie estimates that $3,112 of accumulated other comprehensive income (loss) will be reclassified to finance costs during the remaining three quarters of 2011 based on the interest rate swap agreements settled to March 31, 2011.

A fluctuation in interest rates would have an impact on Crombie's operating income. Based on the previous year's rate changes, a 0.5% interest rate change would reasonably be considered possible. The changes would have had the following impact:

Impact on operating income attributable to Unitholders of interest rate changes on the floating rate revolving credit facility	Impact of a 0.5% interest rate change	
	Decrease in rate	**Increase in rate**
Three Months Ended Mar. 31, 2011	$124	$(124)
Three Months Ended Mar. 31, 2010	$33	$(33)

Impact on other comprehensive income due to changes in fair value of derivatives designated as a cash flow hedge	Impact of a 0.5% interest rate change	
	Decrease in rate	**Increase in rate**
Three Months Ended Mar. 31, 2011	$(408)	$391
Three Months Ended Mar. 31, 2010	$(653)	$631

Crombie does not enter into interest rate swap transactions on a speculative basis. Crombie is prohibited by its Declaration of Trust in purchasing, selling or trading in interest rate future contracts other than for hedging purposes**.**

There have been no significant changes to Crombie's interest rate risk.

Liquidity risk

The real estate industry is highly capital intensive. Liquidity risk is the risk that Crombie may not have access to sufficient debt to fund its growth program and/or refinance debt obligations as they mature.

Cash flow generated from operating the property portfolio represents the primary source of liquidity used to service the interest on debt, fund general and administrative expenses, reinvest in the portfolio through capital expenditures, as well as fund tenant incentive costs and make distributions to Unitholders. Debt repayment requirements are primarily funded from refinancing Crombie's maturing debt obligations. Property acquisition funding requirements are funded through a combination of accessing the debt and equity capital markets.

There is a risk that the debt capital markets may not refinance maturing debt on terms and conditions acceptable to Crombie or at any terms at all. There is also a risk that the equity capital markets may not be receptive to a REIT unit offering issue from Crombie with financial terms acceptable to Crombie. As discussed in Note 21, Crombie mitigates its exposure to liquidity risk utilizing a conservative approach to capital management.

Access to the revolving credit facility is limited to the amount utilized under the facility, the amount of any outstanding letters of credit, plus any unfavourable mark-to-market position on the interest rate swap agreements, and cannot exceed the security provided by Crombie. Any deterioration in the mark-to-market position may reduce Crombie's available credit under the revolving credit facility.

The estimated payments, including principal and interest, on non-derivative financial liabilities to maturity date are as follows:

	Contractual Cash Flows[(1)]	**2011**	**2012**	**2013**	**2014**	**2015**	**Thereafter**
Fixed rate mortgages[(2)]	$1,004,667	$90,006	$62,891	$139,594	$82,755	$100,522	$528,899
Convertible debentures	191,226	9,421	39,406	7,322	7,322	79,521	48,234
	1,195,893	99,427	102,297	146,916	90,077	180,043	577,133
Floating rate revolving credit	50,291	50,291	-	-	-	-	-
Total	**$1,246,184**	**$149,718**	**$102,297**	**$146,916**	**$90,077**	**$180,043**	**$577,133**

(1) Contractual cash flows include principal and interest and ignore extension options

(2) Reduced by the interest rate subsidy payments to be received from ECL Developments Limited

The estimated payments on derivative financial liabilities to maturity dates are as follows:

		Twelve Months Ending March 31					
	Total	**2011**	**2012**	**2013**	**2014**	**2015**	**Thereafter**
Swap agreements	$1,922	$1,922	$-	$-	$-	$-	$-

There have been no significant changes to Crombie's liquidity risk.

21) CAPITAL MANAGEMENT

Crombie's objective when managing capital on a long-term basis is to maintain overall indebtedness, including convertible debentures, in the range of 50% to 60% of gross book value, utilize staggered debt maturities, minimize long-term exposure to excessive levels of floating rate debt and maintain conservative payout ratios.

Crombie's capital structure consists of the following:

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Investment property debt	$793,349	$799,127	$722,017	$706,369
Convertible debentures	146,272	148,433	153,839	110,858
Crombie REIT Unitholders	268,848	268,201	241,244	243,846
SVU and Class B LP Unitholders	232,036	233,774	220,020	222,512
	$1,440,505	$1,449,535	$1,337,120	$1,283,585

At a minimum, Crombie's capital structure is managed to ensure that it complies with the limitations pursuant to Crombie's Declaration of Trust, the criteria contained in the Income Tax Act (Canada) in regard to the definition of a REIT and existing debt covenants. Some of the restrictions pursuant to Crombie's Declaration of Trust would include, among other items:

- A restriction that Crombie shall not incur indebtedness (other than by the assumption of existing indebtedness) where the indebtedness would exceed 75% of the market value of the individual property; and
- A restriction that Crombie shall not incur indebtedness of more than 60% of gross book value (65% including any convertible debentures)

Crombie does not include the financial liabilities to REIT Unitholders and to holders of Class B LP Units, as shown on the balance sheet as net assets attributable to Unitholders, in total debt for purposes of its debt to gross book value. Crombie's debt to gross book value as defined in Crombie's Declaration of Trust is as follows:

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Fixed rate mortgages	$749,657	$755,665	$673,481	$604,992
Convertible debentures	150,734	153,248	160,000	115,000
Revolving credit facility	50,000	50,000	54,500	106,160
Total debt outstanding	950,391	958,913	887,981	826,152
Less: Applicable fair value debt adjustment	(5,747)	(6,106)	(7,225)	(7,733)
Debt	$944,644	$952,807	$880,756	$818,419
Investment properties, cost	$1,586,419	$1,583,210	$1,460,812	$1,399,752
Intangible assets, cost	55,776	55,776	52,144	50,355
Notes receivable	4,065	4,343	5,518	5,921
Other assets, cost (see below)	74,668	72,153	63,831	64,106
Cash and cash equivalents	1,480	5,170	2,861	-
Deferred financing charges	10,770	11,353	12,125	8,925
Interest rate subsidy	(5,747)	(6,106)	(7,225)	(7,733)
Fair value adjustment to deferred taxes	(39,245)	(39,245)	(39,245)	(39,245)
	$1,688,186	$1,686,654	$1,550,821	$1,482,081
Debt to gross book value	56.0%	56.5%	56.8%	55.2%

Other assets are calculated as follows:

	Mar. 31, 2011	Dec. 31, 2010	Mar. 31, 2010	Jan. 1, 2010
Other assets per Note 5	$59,972	$58,803	$54,241	$54,145
Add back				
Tenant incentive accumulated amortization	14,696	13,350	9,590	9,961
Other assets, cost	**$74,668**	**$72,153**	**$63,831**	**$64,106**

Under the amended terms governing the revolving credit facility, Crombie is entitled to borrow a maximum of 70% of the fair market value of assets subject to a first security position and 60% of the excess fair market value over first mortgage financing of assets subject to a second security position or a negative pledge. The terms of the revolving credit facility also require that Crombie must maintain certain covenants:

- annualized net operating income for the prescribed properties must be a minimum of 1.4 times the coverage of the related annualized debt service requirements;
- annualized net operating income on all properties must be a minimum of 1.4 times the coverage of all annualized debt service requirements;
- access to the revolving credit facility is limited by the amount utilized under the facility, the amount of any outstanding letters of credits, and any negative mark-to-market position on the interest rate swap agreements, not to exceed the security provided by Crombie; and
- distributions to Unitholders are limited to 100% of Distributable Income as defined in the revolving credit facility.

Should ECL Developments Limited reduce its voting interest below 40%, Crombie will be required to renegotiate the revolving credit facility or obtain alternative financing. Pursuant to an exchange agreement, and while such voting interest threshold remains in place, ECL Developments Limited will be required to give Crombie at least six months' prior written notice of its intention to reduce its voting interest below 40%.

As at March 31, 2011, Crombie is in compliance with all externally imposed capital requirements and all covenants relating to its debt facilities.

22) COMMITMENTS AND CONTINGENCIES

There are various claims and litigation which Crombie is involved with arising out of the ordinary course of business operations. In the opinion of management, any liability that would arise from such contingencies would not have a significant adverse effect on these financial statements.

Crombie has entered into a management cost sharing agreement with a subsidiary of Empire Company Limited. Details of this agreement are described in "Related Party Transactions" (Note 19).

Crombie obtains letters of credit to support its obligations with respect to construction work on its Investment properties, defeasing Investment property debt and satisfying mortgage financing requirements. Crombie has $223 in standby letters of credit for construction work that is being performed on its Investment properties. In connection with the defeasance of the discontinued operations Investment property debt, Crombie has issued a standby letter of credit in the amount of $1,715 in favour of the mortgage lender. In addition, to satisfy the requirements of mortgage financings, Crombie has issued standby letters of credit in the amount of $11,200 in favour of mortgage lenders. Crombie does not believe that any of these standby letters of credit are likely to be drawn upon.

Land leases have varying terms ranging from 14 to 74 years including renewal options. For the three months ended March 31, 2011, Crombie paid $294 in land lease payments to third party landlords (three months ended March 31, 2010 - $242). Crombie's commitments under the land leases are disclosed in Note 14.

As at March 31, 2011, Crombie has signed construction contracts totalling $4,052.

23) SUBSEQUENT EVENTS

a) On April 19, 2011, Crombie declared distributions of 7.417 cents per unit, for the period from April 1, 2011 to, and including, April 30, 2011. The distribution of $4,926 will be payable on May 16, 2011 to Unitholders of record as at April 30, 2011.

b) On May 2, 2011, Crombie completed the acquisition of a 73,807 square foot retail property in Red Deer, Alberta from a third party. The acquisition price was $21,850, which represents a capitalization rate of 7.26%. Crombie assumed a mortgage of $10,726 upon closing with the balance of the purchase price being initially satisfied through the revolving credit facility.

c) On May 2, 2011, Crombie signed purchase and sale agreements on two properties with Empire Company Limited totalling 137,644 square feet of gross leaseable area. These acquisitions are expected to close during the second quarter of 2011. The purchase price is expected to be $27,500, which represents a weighted average capitalization rate of 7.33%. The purchase price will be initially satisfied through a combination of mortgage debt and Crombie's revolving credit facility.

24) SEGMENT DISCLOSURE

Crombie owns and operates primarily retail and office real estate assets located in Canada. Management, in measuring Crombie's performance or making operating decisions, does not distinguish or group its operations on a geographical or other basis. Accordingly, Crombie has a single reportable segment for disclosure purposes.

25) INDEMNITIES

Crombie has agreed to indemnify its trustees and officers, and particular employees in accordance with Crombie's policies. Crombie maintains insurance policies that may provide coverage against certain claims.

26) EXPLANATION OF TRANSITION TO IFRS

The 2011 fiscal year represents the first year that Crombie is issuing its financial statements under IFRS. These financial statements have been presented as if Crombie had always reported under IFRS. The accounting policies set out in Note 2 have been applied in preparing the financial statements for the three months ended March 31, 2011; the comparative information presented in these financial statements for the three months ended March 31, 2010; the year ended December 31, 2010; the opening IFRS Balance Sheet as at January 1, 2010 (Crombie's date of transition to IFRS), and the comparative balance sheets as at March 31, 2010 and December 31, 2010. An explanation of how the transition from Canadian GAAP to IFRS has affected Crombie's balance sheet, financial performance and cash flows is set out in the following tables and the accompanying notes.

IFRS 1 First-time Adoption of IFRS

IFRS 1 applies when an entity first adopts IFRS. The general provisions in IFRS 1 require retrospective application of IFRS to the first reporting period. However, the standard provides certain mandatory exceptions and allows specific exemptions from this general retrospective application. The significant options selected by Crombie are as follows:

1. Investment properties – Crombie has chosen to apply the fair value as deemed cost exemption as at the transaction date and the cost model for subsequent accounting for its investment properties. Crombie has determined the fair value of its investment properties, on a property-by-property basis, as at the transition date, and has elected to adjust the carrying value of certain specific properties, or components thereof, to this fair value as the deemed cost at transition. Any adjustment to the carrying value at the transition date is reflected as an increase or decrease in investment properties, and an offsetting increase or decrease in net assets attributable to Unitholders at that date. The impact of this election was to increase the carrying value of certain specific properties by approximately $87,500, and to decrease the carrying value of other specific properties by approximately $87,500; for a net overall impact on net assets attributable to Unitholders of $NIL.

2. Business combinations – Crombie has elected to apply the business combination accounting standard prospectively to all subsequent business acquisitions.

3. Leases – Crombie has elected to use facts and circumstances existing at the date of transition to determine whether an arrangement contains a lease.

4. Employee benefits – Crombie has elected to recognize all cumulative actuarial gains and losses for its defined benefit plans at the date of transition. Crombie has elected to use the exemption not to disclose defined benefit plan surplus/deficit and experience adjustments before the date of transition.

5. Borrowing costs – Crombie has elected to apply the revisions in 2007 for IAS 23 Borrowing Costs prospectively to borrowing costs that occurred before the date of transition.

6. Estimates – Crombie has used estimates under IFRS that are consistent with those applied under Canadian GAAP, with adjustment for accounting policy differences.

(a) Reconciliation of Consolidated Balance Sheet at January 1, 2010 (date of transition to IFRS)

	Note	Canadian GAAP	Effect of transition to IFRS	IFRS
Investment properties	(i)	$1,314,611	$14,585	$1,329,196
Intangible assets	(i)	103,357	(76,190)	27,167
Other assets	(i)	24,100	30,045	54,145
Notes receivable	(ii)	8,169	(2,248)	5,921
Asset related to discontinued operations		6,929	-	6,929
Total assets		**1,457,166**	**(33,808)**	**1,423,358**
Investment property debt		706,369	-	706,369
Convertible debentures		110,858	-	110,858
Deferred income tax	(iii)	79,700	4,000	83,700
Trade and other payables	(iv)	39,223	4,522	43,745
Intangible liabilities	(i)	31,558	(31,558)	-
Employee future benefits obligation	(v)	6,260	(266)	5,994
Liabilities related to discontinued operations		6,334	-	6,334
Distributions payable	(iv)	4,522	(4,522)	-
Total liabilities excluding net assets attributable to Unitholders		**984,824**	**(27,824)**	**957,000**
Net assets attributable to Unitholders	(vi)	**$472,342**	**$(5,984)**	**$466,358**
Net assets attributable to Unitholders represented by				
Crombie REIT Unitholders		$246,975	$(3,129)	$243,846
SVUs and Class B LP Unitholders		225,367	(2,855)	222,512
		$472,342	**$(5,984)**	**$466,358**

(i) Investment properties, Intangible assets, Other assets and Intangible liabilities – As explained in Crombie's IFRS 1 election and detailed in the table below, Crombie has adjusted the transition date carrying value of components of Investment properties, as well, specific Intangible assets and Intangible liabilities previously recognized separately under Canadian GAAP have been reclassified to Investment properties. Crombie recognizes Tenant relationships as an Intangible asset under IFRS. Crombie recognizes Tenant incentives as a separate receivable asset within Other assets.

	Canadian GAAP	Effect of transition to IFRS	Reclassification	IFRS balance
Investment properties				
Land	$286,491	$81,546	$ -	$368,037
Buildings	992,071	(71,354)	38,498	959,215
Recoverable capital expenditures	3,847	-	(3,847)	-
Tenant incentives and deferred leasing costs	32,202	(213)	(30,045)	1,944
Total investment properties	**$1,314,611**	$9,979	$4,606	**$1,329,196**
Intangible assets				
Origination costs for existing leases	$35,638	$(3,242)	$(32,396)	$-
In-place leases	29,977	(2,240)	(27,737)	-
Tenant relationships	32,836	(5,669)	-	27,167
Above-market existing leases	4,906	(1,156)	(3,750)	-
Total Intangible assets	**$103,357**	$(12,307)	$(63,883)	**$27,167**
Intangible liabilities	**$31,558**	**$(2,327)**	**$(29,231)**	**$-**

(ii) Notes receivable - Long-term Notes receivable were adjusted to present value on transition to IFRS.

(iii) Deferred income tax – As a result of the change in the carrying value of specific Investment properties and components of specific properties, some of which are held within a subsidiary which is a corporate taxable entity, deferred income tax liability has been increased on transition.

(iv) Trade and other payables and Distributions payable – With the reclassification of Crombie's Units to financial liabilities under IFRS, distributions on those units are considered a finance cost. As such, the previous distributions payable have been reclassified and included in Trade and other payables.

(v) Employee future benefits obligation – On transition to IFRS, Crombie recognized the accumulated unamortized actuarial gains and losses.

(vi) Net assets attributable to Unitholders – Under Canadian GAAP, Crombie's REIT Units were recognized as equity and its Class B LP Units were recognized as Non-controlling interest. Under IFRS, both the REIT Units and the Class B LP Units are classified as financial liabilities.

(b) Reconciliation of Consolidated Balance Sheet at December 31, 2010

	Note	Canadian GAAP	Effect of changes to Opening Balance Sheet	Impact of transition to IFRS	IFRS
Investment properties	(i)	$1,453,996	$14,585	$19,411	$1,487,992
Intangible assets	(i)	116,658	(76,190)	(14,210)	26,258
Other assets	(i)	25,355	30,045	3,403	58,803
Notes receivable	(ii)	6,211	(2,248)	380	4,343
Asset related to discontinued operations		6,670	-	-	6,670
Cash and cash equivalents		5,170	-	-	5,170
Total assets		**1,614,060**	**(33,808)**	**8,984**	**1,589,236**
Investment property debt		799,127	-	-	799,127
Convertible debentures		148,433	-	-	148,433
Deferred income tax	(iii)	77,200	4,000	1,500	82,700
Trade and other payables		39,840	4,522	381	44,743
Intangible liabilities	(i)	27,515	(31,558)	4,043	-
Employee future benefits obligation		6,562	(266)	(209)	6,087
Liabilities related to discontinued operations		6,171	-	-	6,171
Distributions payable		4,903	(4,522)	(381)	-
Total liabilities excluding net assets attributable to Unitholders		**1,109,751**	**(27,824)**	**5,334**	**1,087,261**
Net assets attributable to Unitholders		**$504,309**	**$(5,984)**	**$3,650**	**$501,975**
Net assets attributable to Unitholders represented by					
Crombie REIT Unitholders		$269,406	$(3,129)	$1,924	$268,201
SVUs and Class B LP Unitholders		234,903	(2,855)	1,726	233,774
		$504,309	**$(5,984)**	**$3,650**	**$501,975**

(i) Investment properties, Intangible assets, Other assets and Intangible liabilities – The impact of transition to IFRS on Investment properties as at December 31, 2010 has been the change in depreciation expense recognized resulting from the changed cost base and the reclassification of additions during 2010 which were included in Intangible assets and Intangible liabilities under Canadian GAAP. The impact on both Intangible assets and Intangible liabilities as at December 31, 2010 has been the reclassification of additions during 2010 to Investment properties. Other assets have been impacted by the reclassification of Tenant incentives to a receivable asset.

(ii) Notes receivable – Long-term Notes receivable, which were present valued on transition to IFRS, are being accreted.

(iii) Deferred income tax – The determination of the liability is impacted by the changes made to the carrying value of specific Investment properties and components of those properties on transition to IFRS.

(c) Reconciliation of Consolidated Balance Sheet at March 31, 2010

	Note	Canadian GAAP	Effect of changes to Opening Balance Sheet	Impact of transition to IFRS	IFRS
Investment properties	(i)	$1,362,734	$14,585	$6,907	$1,384,226
Intangible assets	(i)	109,001	(76,190)	(5,798)	27,013
Other assets	(i)	23,507	30,045	689	54,241
Notes receivable	(ii)	7,661	(2,248)	105	5,518
Asset related to discontinued operations		6,912	-	-	6,912
Cash and cash equivalents		2,861	-	-	2,861
Total assets		**1,512,676**	**(33,808)**	**1,903**	**1,480,771**
Investment property debt		722,017	-	-	722,017
Convertible debentures		153,839	-	-	153,839
Deferred income tax	(iii)	78,600	4,000	1,100	83,700
Trade and other payables		43,051	4,522	1	47,574
Intangible liabilities	(i)	31,053	(31,558)	505	-
Employee future benefits obligation		6,349	(266)	-	6,083
Liabilities related to discontinued operations		6,294	-	-	6,294
Distributions payable		4,523	(4,522)	(1)	-
Total liabilities excluding net assets attributable to Unitholders		**1,045,726**	**(27,824)**	**1,605**	**1,019,507**
Net assets attributable to Unitholders		**$466,950**	**$(5,984)**	**$298**	**$461,264**
Net assets attributable to Unitholders represented by					
Crombie REIT Unitholders		$244,216	$(3,129)	$157	$241,244
SVUs and Class B LP Unitholders		222,734	(2,855)	141	220,020
		$466,950	**$(5,984)**	**$298**	**$461,264**

(i) Investment properties, Intangible assets, Other assets and Intangible liabilities – The impact of transition to IFRS on Investment properties as at March 31, 2010 has been the change in depreciation expense recognized resulting from the changed cost base and the reclassification of additions during the first quarter of 2010 which were included in Intangible assets and Intangible liabilities under Canadian GAAP. The impact on both Intangible assets and Intangible liabilities as at March 31, 2010 has been the reclassification of additions during the first quarter of 2010 to Investment properties. Other assets have been impacted by the reclassification of Tenant incentives to a receivable asset.

(ii) Notes receivable –Long-term Notes receivable, which were present valued on transition to IFRS, are being accreted.

(iii) Deferred income tax – The determination of the liability is impacted by the changes made to the carrying value of specific Investment properties and components of those properties on transition to IFRS.

(d) Reconciliation of Consolidated Statement of Comprehensive Income (Loss) for the year ended December 31, 2010

	Note	Canadian GAAP	Effect of transition to IFRS	IFRS
Property revenue	(i)	$216,996	$(7,559)	$209,437
Property operating expenses		79,300	-	79,300
Net property income		**137,696**	(7,559)	**130,137**
Depreciation of investment properties	(ii)	(20,094)	(4,369)	(24,463)
Amortization of intangible assets	(ii)	(16,939)	10,609	(6,330)
Amortization of deferred leasing costs	(iii)	(5,070)	4,617	(453)
Depreciation of recoverable capital expenditures	(ii)	(1,264)	1,264	-
General and administrative costs		(10,579)	817	(9,762)
Lease terminations		347	-	347
Operating income before finance costs and income taxes		**84,097**	5,379	**89,476**
Finance costs - operations		(58,789)	379	(58,410)
Operating income before income taxes		**25,308**	5,758	**31,066**
Income taxes - deferred		2,500	(1,500)	1,000
Operating income attributable to Unitholders		27,808	4,258	**32,066**
Finance costs – distributions to Unitholders	(iv)	-	(56,090)	(56,090)
Increase (decrease) in net assets attributable to Unitholders		**27,808**	(51,832)	**(24,024)**
Costs incurred on derivatives designated as cash flow hedges transferred to finance costs-operations		4,015	-	4,015

Change in employee future benefits obligation		-	(608)	(608)
Other comprehensive income (loss)	(v)	**5,079**	(608)	**4,471**
Comprehensive income (loss)		**$32,887**	$(52,440)	**$(19,553)**

(i) Property revenue – Property revenue is impacted by the removal of amortization of above-market and below-market leases as well as the reclassification of amortization of tenant incentives to Property revenue.

(ii) Depreciation and amortization – As previously discussed, on transition to IFRS, various properties and components of properties were reclassified and adjusted to fair value as deemed cost, impacting the previously reported amounts of depreciation and amortization.

(iii) Amortization of deferred leasing costs – This expense included amortization of tenant incentives, which is now included as an offset to Property revenue.

(iv) Finance costs – distributions to Unitholders – With the reclassification of Crombie's REIT Units and Class B LP Units to financial liabilities, the distributions payable on those units is treated as a finance cost under IFRS.

(v) Other comprehensive income (loss) – The amounts shown above under Canadian GAAP have been adjusted to include the amounts previously shown as part of Non-controlling interest.

(e) Reconciliation of Consolidated Statement of Comprehensive Income (Loss) for the three months ended March 31, 2010

	Note	Canadian GAAP	Effect of transition to IFRS	IFRS
Property revenue	(i)	$53,221	$(1,863)	$51,358
Property operating expenses		20,008	-	20,008
Net property income		**33,213**	(1,863)	**31,350**
Depreciation of investment properties	(ii)	(4,830)	(1,260)	(6,090)
Amortization of intangible assets	(ii)	(4,926)	2,983	(1,943)
Amortization of deferred leasing costs	(iii)	(1,234)	1,145	(89)
Depreciation of recoverable capital expenditures	(ii)	(289)	289	-
General and administrative costs		(2,523)	**-**	(2,523)
Operating income before finance costs and income taxes		**19,411**	1,294	**20,705**
Finance costs - operations		(13,634)	104	(13,530)
Operating income before income taxes		**5,777**	1,398	**7,175**
Income taxes - deferred		1,100	(1,100)	-
Operating income attributable to Unitholders		6,877	298	**7,175**
Finance costs – distributions to Unitholders	(iv)	-	(13,568)	(13,568)
Increase (decrease) in net assets attributable to Unitholders		**6,877**	(13,270)	**(6,393)**
Costs incurred on derivatives designated as cash flow hedges transferred to finance costs-operations		827	-	827
Net change in derivatives designated as cash flow hedges		315	-	315
Other comprehensive income (loss)	(v)	**1,142**	-	**1,142**
Comprehensive income (loss)		**$8,019**	$(13,270)	**$(5,251)**

(i) Property revenue – Property revenue is impacted by the removal of amortization of above-market and below-market leases as well as the reclassification of amortization of tenant incentives to Property revenue.

(ii) Depreciation and amortization – As previously discussed, on transition to IFRS, various properties and components of properties were reclassified and adjusted to fair value as deemed cost, impacting the previously reported amounts of depreciation and amortization.

(iii) Amortization of deferred leasing costs – This expense included amortization of tenant incentives, which is now included as an offset to Property revenue.

(iv) Finance costs – distributions to Unitholders – With the reclassification of Crombie's REIT Units and Class B LP Units to financial liabilities, the distributions payable on those units is treated as a finance cost under IFRS.

(v) Other comprehensive income (loss) – The amounts shown above under Canadian GAAP have been adjusted to include the amounts previously shown as part of Non-controlling interest.

(f) **Impact on Statements of Cash Flows**

As a result of the transition to IFRS, certain items on the statements of cash flows have been impacted as follows:

- Distributions to Unitholders previously recognized in financing activities are now recognized as finance costs on the statements of comprehensive income (loss) and flow through operating activities.
- Additions to tenant incentives and deferred leasing costs previously recognized in operating activities are now recognized in investing activities.

Notes to the reconciliations:

a) Investment properties

Assets previously disclosed as commercial properties under Canadian GAAP have been disclosed as investment properties under IFRS. All of Crombie's properties qualify as investment properties. Crombie has adopted the cost model for investment properties, meaning that the properties are carried at cost and are subject to depreciation and amortization charges over their estimated useful lives less any residual values. IFRS 1 allows for properties and components of properties to be re-measured to fair value at the transition date, with this re-measured value to represent the deemed cost of the property at the date of transition. Crombie has applied this election on a property-by-property basis as at January 1, 2010. As a result, some of the carrying values of specific properties have adjusted upward and/or downward; as have specific components of individual properties. There were also changes in the carrying value of intangible assets and intangible liabilities, and classification of amounts from intangible assets and intangible liabilities to investment properties. There was no overall net change in the total carrying value on the transition date.

b) Intangible assets and intangible liabilities

Under IFRS, the only separately recognized intangible for Crombie is for tenant relationships. Other previously recognized intangibles may be included as a component of investment properties and depreciated as part of depreciation of investment properties.

c) Deferred tax assets and liabilities

Under Canadian GAAP, all future tax assets (liabilities) are classified based on the asset (liability) to which it is related to. Under IAS 12, *Income Taxes*, these are referred to as deferred tax assets (liabilities) and are always classified as non-current.

d) Depreciation and amortization expenses

(i) As a result of the reclassification of above-market and below-market leases to components of Investments properties, these amounts are no longer amortized into property revenue but are depreciated, and the depreciation is included in Depreciation of investment properties.
(ii) Amortization of tenant incentives, previously reported as a separate expense on the statements of income under Canadian GAAP, is now included in the calculation of property revenue under IFRS.
(iii) Recoverable capital expenditures were previously recognized as a separate item of commercial properties under Canadian GAAP. These amounts are now included as part of the buildings component of investment properties under IFRS. As a result, the related Depreciation is included in depreciation of investment properties.

e) Employer future benefits obligation

Under Canadian GAAP, actuarial gains and losses are amortized on a straight-line basis over the expected average remaining service lifetime of the active members ("EARSL"). Upon adoption of IFRS, Crombie has elected to record the unamortized actuarial gains and losses in accumulated other comprehensive income (loss) upon transition to IFRS.

MULTIPLE MAILINGS

If you have more than one account, you may receive a separate mailing for each. If this occurs, please contact CIBC Mellon Trust Company at (800) 387-0825 to eliminate multiple mailings.

Crombie REIT

EVERYDAY ADVANTAGES

Proven assets

Crombie is the largest owner and manager of commercial real estate in Atlantic Canada, with a growing network of grocery-anchored plazas and stand-alone stores across the country.

High-quality cash flow

More than half of Crombie's minimum annual rents are derived from investment grade tenants; almost 90 percent are derived from national and regional companies.

A solid financial foundation

We are built for sustainable growth with a conservative financial structure, moderate leverage and ample liquidity.

A winning growth strategy

Our unique relationship with Empire and Sobeys is expected to fuel baseline annual revenue growth of six percent.
